

## APPENDIX I

### Request for Authorization to Discontinue the Master of Immunology Degree at North Carolina State University

#### Requested Action

North Carolina State University requests that the MS in Immunology (CIP# 26.0507) be removed from the UNC Academic Program Inventory.

#### Rationale

No students have been admitted to the program, and there has not been strong support for it by the Immunology faculty. Both the Master of Science and the Doctor of Philosophy degrees in Immunology will continue to be offered. The Master of Immunology is an interdisciplinary program shared by the College of Veterinary Medicine and the College of Agriculture and Life Sciences, and approvals from both colleges have been obtained.

#### Recommendation

It is recommended that the Board of Governors approve the request to discontinue the Master of Immunology degree at North Carolina State University effective June 2004.
