

APPENDIX T

Allocations of Funds – Capital Improvements

A Capital Improvements Appropriations and Authorizations

The General Assembly appropriated \$139,980,000 from the General Fund for the following projects, in addition to authorizing the issuance of certificates of participation totaling \$45,827,400 for the Construction of the UNC Charlotte Center City Classroom Building.

Appalachian State University College of Education Building – Planning	\$ 1,820,000
Fayetteville State University Science and Technology Complex – Planning	1,000,000

Winston Salem State University Student Activities Center – Planning	768,225
Dental Schools – Planning	7,000,000
Reserve for Capital Cost Overruns	2,300,000

B. Reserve for Repairs and Renovations

The 2006 General Assembly appropriated \$222,229,189 to the Statewide Reserve for Repairs and Renovations, of which \$102,225,427 (46%) was allocated by special provision to the Board of Governors. The University's 2006 allocation for repairs and renovations has been supplemented from two sources. A settlement of legal claims against the designer and contractors involved in the mold infestation of residence halls at North Carolina Central University totaling \$1,500,000 has been added to funds appropriated by the legislature. A total of \$2,300,000 has been added as a transfer to ECSU, NCCU, and UNCA from a legislatively-created reserve for cost overruns as a partial offset to the designated items made in the 2006 appropriations bill.

Of the funds allocated to the Board of Governors, the General Assembly designated by special provision the following allocations:

- (1) Parking and road repairs and improvements at Elizabeth City State University - \$1,900,000
- (2) Replacement and repair of steam lines and steam tunnels at North Carolina Central University - \$6,400,000
- (3) Planning for eligible repair and renovation projects at Rhodes Hall at the University of North Carolina at Asheville - \$416,000

In 1994, the Board of Governors adopted a formula for the allocation of repair and

renovation appropriations to the campuses. The formula takes into account the institutional mission, size, and condition of campus facilities in determining institutional allocations, with the principal responsibility for the selection of specific projects resting with the Chancellors. High priority projects that would not otherwise be funded through institutional allocations are deducted from the available funds prior to applying the formula to determine campus allocations. The Board's formula has been updated to reflect the recommendations resulting from the 2004 review of the model and uses the most recent data available.

It is recommended that the following allocations be made from the Reserve for Repairs and Renovations. It is recommended that Chancellors identify specific projects to be financed from the institutional allocations and present those projects to the President to be transmitted to the Joint Legislative Commission on Governmental Operations and the Fiscal Research Division of the Legislative Services Office for their joint review, as required by legislation.

It is further recommended that allocations to an institution may be transferred as needed among projects within that institution upon the request of the Chancellor and the approval of the President.

REVISIONS TO PROJECTS APPROVED IN 2004

During the 2004 Session, the General Assembly authorized, in House Bill 1264 (Session Law 2004-179), the construction of UNC capital projects to be funded from certificates of participation. At the request of the Board, the 2006 General Assembly amended previous law to properly define the scope of four UNC projects. It is recommended that the constituent institutions be authorized to proceed with the projects as directed by the General Assembly. The changes are shown below.
