

THE UNIVERSITY OF NORTH CAROLINA
FALL 2009 ENROLLMENT REPORT

December 2009

DRAFT

The University of North Carolina General Administration

The University of North Carolina

Fall 2009 Enrollment Report

Executive Summary

Enrollment. The enrollment in UNC grew to a summed headcount of 222,322 students in the fall of 2009, an increase of 6,630 students over the previous fall. This was a 3.1% overall increase in enrollment.

Changes in Reporting Headcount Enrollment. Due to students taking courses now on more than one campus, UNC will also report a non-duplicated number for each fall term, and a non-duplicated number for the previous annual enrollment. For fall 2009, 673 students were enrolled at more than one UNC campus, so the fall unduplicated headcount is 221,649.

SAT Averages. The average combined SAT for fall 2009 UNC freshmen was 1084 which compares to a national combined average SAT score of 1016.

Minority Enrollment. There were 65,267 minority students enrolled in UNC which is 31.8 percent of the overall number of students whose diversity category is known.

Distance Education Enrollment. Enrollment in distance education programs continues to grow. There were 23,820 enrolled in distance only courses for an increase of 7.0 percent over the previous year. An additional 14,530 regular term students also enrolled in distance education courses, which was an increase of 35.2 percent over the previous fall. Budget constraints appear to have affected the growth rate of distance programs. On the other hand students appear to be mixing distance education courses and traditional residential courses, since the combination of those enrolled in distance only and those enrolled in distance and residential courses is up 16.2 percent over fall 2008.

The University of North Carolina

Fall 2009 Enrollment Report

Introduction

Until 2006 UNC GA provided two enrollment reports, a data report summarizing the fall enrollment that was normally available for the November BOG meeting and a more detailed report that was presented to the Educational Planning Committee in January. The second report was statutorily required through December 2005. Several campuses have only recently converted to Banner for student data and extracting enrollment data has taken more time for those campuses so it has not been possible to do a full data report for the November meeting. Reflecting this fact and the fact that a specific report is no longer required by the General Assembly, the November and January reports are now combined. The combined report will provide enrollment data and analysis of the data and will be provided to the General Assembly as an optional enrollment data report following the January Board meeting.

Three attachments and a set of PowerPoint slides are included at the end of this report. Attachment 1 provides a breakdown of enrollment by diversity category and provides a twenty-year history of this information for each campus. Page 7 of 7 of Attachment 1 provides UNC totals. Attachment 2 provides details of the participation of NC high school graduates in UNC institutions. Attachment 3 provides information about SAT scores and the percentage of freshmen who are state residents. The PowerPoint slides provide the “Figures” referred to in the text and the “Tables” are arrayed throughout the narrative.

Changes in Reporting Headcount Enrollment

UNC is making some adjustments in reporting its headcount enrollment. Traditionally it has reported the summed enrollment of its constituent institutions for fall term each year. It will continue to do that but will add some additional information about its enrollment. The fall number will still be reported as it always has been, except it will be referred to as the summed headcount enrollment of the campuses. Two other sets of numbers will be reported as well. Due to the availability of distance and online programs, as well as joint degree programs, students are simultaneously enrolling in more than one UNC campus. UNC will report a non-duplicated system headcount number for each fall term as well. This number will count a student only once

even if the student is enrolled in two or more campuses. This is a system non-duplicated fall term enrollment headcount.

The advantage of reported fall term enrollment is to have a number available in a timely manner to indicate growth or change in the institutions. In the course of an academic year, UNC campuses serve students with varying needs that are quite different from the traditional full-time student who resides on campus and typically begins college in the fall term. To capture the number of students served in a full academic year, UNC will also report a non-duplicated annual headcount enrollment number. This number will be available only after a full academic year has been completed and the reporting cycle has been completed. Nonetheless, it will help provide a more accurate picture of the number of students being served by UNC.

In addition, more attention will be given to reporting high school enrollments due to three developments: Early College High Schools on UNC campuses, the North Carolina School for Science and Mathematics becoming a constituent institution of UNC, and UNC's systematically offering online college courses to high school students.

Fall 2009 Headcount Enrollment¹

The summed headcount enrollment for fall 2009 reached a new record high for UNC of 222,322 students. This is an increase of 6,630 students (or 3.1 percent) over the 215,692 who were enrolled fall 2008 (Figure 1). This marks the eighth year in a row that UNC's fall enrollment increase has exceeded 6,000 students. This is a cumulative enrollment increase of 59,561 students since 2000. This increase would be equivalent of adding four additional campuses the size of ASU, UNCC, UNCA and NCCU. This also marks the fourth year UNC has exceeded 200,000 students in the fall term.

Thirteen UNC constituent universities (ASU, ECSU, FSU, NCA&T, NCCU, NCSU, UNCA, UNC-CH, UNCC, UNCG, UNCP, UNCW, and WCU) experienced growth this fall, while three institutions did not grow (ECU, UNCSA, and WSSU). Seven institutions exceeded the system average growth of 3.1 percent: ECSU, 5.2%; NCCU, 6.9%; UNCA, 7.4%; UNCC, 6.0%; UNCG, 6.7%; UNCP, 5.7%; and WCU, 4.2% (Figure 2).

¹ This report on fall enrollment includes on-campus and off-campus enrollments, a change first made in the fall 2000 report. All trend data in the attached tables have been revised to include off-campus enrollments.

Table 1. Fall 2009 UNC Headcount Enrollment						
Institution	Undergraduate			Graduate	Grand Total**	High School
	Traditional Undergraduate	High School Students in College Programs*	Total			
ASU	14,872		14,872	2,096	16,968

WCU	7,450		7,450	1,979	9,429	
WSSU	5,960		5,960	467	6,427	
UNC Total	172,737	3,396	176,133	46,189	222,322	958
*High School Students in College Programs include: early college high schools (at ECU, FSU, NCA&T, NCCU, and UNCW) and learn and earn online (iSchool) at UNCG.						
**Grand total does not include high school enrollment figures.						

The headcount growth was most dramatic among four institutions, each with increases of 500 or more students led by UNCC with enrollment increase of 1,401 students: UNCG (1,330), NCSU (947), and NCCU (552).

Undergraduate enrollment grew from 170,472 to 176,133 an increase of 5,661 students or 3.3% (compared to 3.0% the previous year). Graduate enrollment grew from 45,220 to 46,189, an increase of 969 students or 2.1% (compared to 3.7% the previous year).

Change in SAT Scores

There was a significant change in the SAT in 2006. The verbal section became critical reading (dropping analogies and adding critical reading passages) and the mathematics section added elements of Algebra II for the first time. In addition, a third section on writing was made available. The Board of Governors made a writing test mandatory for UNC applicants. So our

students have reported results on three tests since fall 2006, with each test having a range of 200-800. UNC has decided to report the writing test separately for the first several years, and then make a decision as to whether to combine the three test scores. UNC campuses are in the process of testing the validity of the writing test and deciding how they will use it in assessing students for admission. UNC's combined average SAT score for all campuses for the fall 2009 freshmen is 1084 up from 1083 for fall 2008 and above the national average of 1016. Most campuses had higher average SAT scores for out-of-state students.

Table 2. Fall 2009 Enrollment & Comparison to Fall 2008			
Institution	Fall 2008	Fall 2009	Change
ASU	16,610	16,968	358

WSSU	6,442	6,427	(15)
Total	215,692	222,322	6,630

First-Time Students Who Graduated from a NC High School

The proportion of recent North Carolina high school graduates who entered a UNC institution this fall is 28.4 percent (Figure 5). This is a preliminary participation number based on fall enrollment and an estimate of the number of graduates from North Carolina high schools for 2008-09. A final annual participation rate, which will include second term enrollment in the university of new high school graduates from 2008-09, will be available in the spring of 2010. The preliminary participation percentage for fall 2008 was 29.2% but the percent for all of 2007-08 was 30.1%.

The total number of first-time freshmen increased by 0.7 percent, the number of undergraduate transfer students increased by 3.4 percent and the number of new graduate and first professional students decreased by 6.8 percent (Figure 6). New community college transfers were up 5.3 percent.

Minority Enrollment and Minority Presence

Minority enrollment (of those identified) increased by 2,625 students (4.2 %) and is 31.8 percent of the University's enrollment adjusted for those whose race or ethnicity (other) is not known, up from 31.2 percent last year. Total enrollment of minority students for fall 2009 is 65,267. The growth rate for white students was 1.1 percent or 1,553. The percentages are (Figure 7):

- African American students (up 2.9 percent or 1,386 students)
- American Indian students (down 1.5 percent or 36 students)
- Asian students (up 3.5 percent or 235 students)
- Hispanic students (up 18.3 percent or 1,040 students)

After a decline last year, African American enrollment grew at both the historically black institutions (2.3 percent) and the historically white institutions (3.0 percent). White enrollment increased at historically white institutions (1.1 percent) and, after a decline last year, increased at historically black institutions (4.1 percent). Taken together, these changes produced an enrollment at the historically white institutions that is 10.8 percent African American, and an enrollment at the historically black institutions that is 11.9 percent white. In percentage terms, this is the twelfth year in a row that African American students have exceeded 10 percent of the total enrollment at the historically white institutions. This means that 43.5 percent (21,465) of UNC's African American students now enroll at historically white or historically American Indian institutions. By contrast, 5.0 percent (6,992) of UNC's white students enroll at historically black or American Indian institutions.

Although male enrollments grew at a higher percentage rate (3.3% compared to 2.9% for women), female students numerical growth was larger (3,610 compared to 3,020 men), and women constitute 57.4 percent of fall 2009 enrollment.

Distance Education

The number of students enrolled in distance education only courses this fall is 23,820, an increase of 1,554 (7.0 percent, Figure 14). An additional 14,530 regular term students enrolled in distance education courses (an increase of 35.2% over the previous year), for a total of 38,350 students enrolled in at least one distance education course, an increase of 16.2% over the previous year. Growing numbers of regular term students are choosing to take distance-learning courses, generally online utilizing information technology. As might be expected, distance education courses are especially convenient for nontraditional students (age 25 and older), who constitute 57.7 percent of all students taking a distance education course. Students, to a greater

extent than ever, appear to be combining distance education and traditional residential coursework.

Origin of First-Time-in-College Freshmen

Of new freshmen, 86.3 percent were from North Carolina, and 13.7 percent were from out-of-state. Two campuses, ECU (18.7 percent) and UNC-Chapel Hill (18.3 percent), exceeded the 18 percent cap on the percent of freshmen who are from out-of-state (NCSA and NCA&T have special provisions; with freshmen out-of-state engineering majors excluded the percentage for NCA&T is 14.6 percent). This is the second year ECU has exceed the 18% cap.

Non-duplicated Enrollment

For fall 2009, the summed enrollment of the campuses is 222,322 but 673 of those students were enrolled on more than one UNC campus. If those who enrolled on more than one campus are subtracted from the summed enrollment the result is the non-duplicated enrollment for fall 2009 of 221,649. While both numbers will be reported, the summed number remains the key number since it reflects the number of students being served on each campus.

Table 3. UNC Unduplicated Fall and Annual Enrollment	
Fall 2004	189,072
Annual 2004-05	225,393
Fall 2005	195,654
Annual 2005-06	225,738
Fall 2006	201,687
Annual 2006-07	232,020
Fall 2007	208,360
Annual 2007-08	226,763
Fall 2008	215,047
Annual 2008-09	234,022
Fall 2009	221,649
Annual 2009-10	NA

The annual non-duplicated enrollment for all UNC campuses for 2008-09 is 234,022. While fall term provides an initial snapshot of one term's enrollment, the campuses serve many students who will not be captured in fall term enrollment. Many freshmen begin college in the spring term each year. Distance and online students may start in the spring or summer. Many teachers return in the summer to complete degrees or certification, or take advantage of professional development opportunities. Enrollment and graduation data suggest that many students stop out for whole terms and return in subsequent terms. So the annual non-duplicated headcount gives a fuller picture of the educational activity of the campuses.

High School Student Enrollment

UNC has had high school students, but historically limited to the North Carolina School of the Arts' high school program. Recent developments have accelerated the number of high school students enrolled in high school or college courses under the jurisdiction of UNC. Several campuses have developed Early College High Schools on their campuses. These are high

schools operated on a college campus through a contract with the local school board. In July 2007, based on legislation approved by the General Assembly and representing the desires of the respective boards, the North Carolina School of Science and Mathematics became a constituent high school of the University of North Carolina. In addition, the Learn and Earn Online program in North Carolina was initiated in 2007-08. This initiative utilized online college courses for delivery to high school students while still in high school. Both UNC and the NCCCS were authorized to offer online courses to high school students. UNCG, due to its experience in delivering college courses to high school students through its iSchool, took the lead for UNC, though other campuses will join UNCG in providing college courses online to high school students. For fall 2009, 2,785 of their total enrollment are high school students taking college courses online. UNC has five early college high schools at ECU, FSU, NCA&T, NCCU and UNCW. The combined headcount taking college courses in those programs is 611. (Table 1)

The School of Science and Mathematics offers a resident program to 669 juniors and seniors, and provides access to its courses through teleconferencing and by offering high school courses online to students not in residence. The School of Science and Mathematics also enrolls students online who could not be accepted for residency. Fall term nine courses were offered with 109 enrollments in this online program. The School of the Arts has long had a high school focused on the arts and for fall 2009 had 289 students enrolled.

Comparison to Enrollment Targets

UNC's operative ten-year enrollment plan covers 2002-2012 and was established in 2002 (Table 4). The plan is stated in terms of five and ten-year targets overall and by campus. The overall target for fall 2007 was 208,831, and the actual fall enrollment for fall 2007 was 209,059, which varies from the target by 228 students, exceeding the target very slightly. The target for 2012 is 235,180 and the UNC campuses are well on track to meet and exceed the enrollment target for 2012.

Table 4. UNC Ten-Year Enrollment Growth Plan (2002-2012)

Fall headcount enrollment, 2002 actual and planned targets for 2007 and 2012							
Institution	2002 (actual)	2007 (target)	% increase	2012 (target)	% increase	Total Increase	% increase
ASU	14,178	15,382	8.49%	16,731	8.77%	2,553	18.01%

TOTAL	176,967	208,831	18.01%	235,180	12.62%	58,213	32.89%

* NCSA enrollment figures do not include high school students.

Developing the Next Ten-Year Enrollment Plan

Recent UNC projections indicate that there will be well over 50,000 more students seeking to attend UNC institutions by 2017-2018. The campuses are engaged in a review of the enrollment demands they expect to face in the next ten years and what it will take to meet those demands. At the same time the UNC Tomorrow Commission findings are being implemented. The findings of that Commission will need to be factored into the next cycle of enrollment planning, particular as new programs are indicated or existing programs need to be expanded for wider delivery. A new ten-year enrollment plan will be developed in the spring of 2010 that will take into account the results of UNC Tomorrow.

Note: Effective fall 2000, historical data (1986-1999) were revised to include "distance education only" enrollments not included in previous reports. These data are taken from historical Student Data Files, where the quality of "distance education only" data improves in more recent years. Fall 2000 and forward data include "distance education only" directly from the Student Data File. Fall 1972 "Other" is included in "White." Fall 1990 and later - "Other/Unknown" includes non-resident aliens, unreported race, and mixed race. Fall 2009 - "Asian" includes Asian and Hawaiian/Pacific Islander. "Other/Unknown" includes non-resident aliens, unreported race, and two more races.

UNC-GA ProgAssess/HSGrads.AT007.U/12-9-09

* Estimates of private N.C. high school graduates by race assume that 94% were white, 5% black, .6% Asian, and .4% Hispanic in each year. Estimates of total graduates in private school are derived by using 99% of 12th grade enrollment, which is obtained from the web site of NC Dept. of Administration, Div. of Non-Public Education.

** Total includes the number of students in the "Other or Multi-race" category.

Source:

1. Public high school graduates - State Department of Public Instruction
2. Private high school graduates - Estimated by GA Staff.
3. Special high school graduates - data provided directly by the high school (NCSA and NCSSM provided on Student Data File).
4. First-time freshmen enrollments - Student Data Files.

UNC-GA ProgAssess/Admiss.AT001.U/12-9-09

* SAT averages are based only on freshmen with SAT scores. Number of students includes both those with and without SAT scores. About 4.1 percent of the total first-time freshmen in Fall 2009 did not have SAT scores.

** Excludes four-year diploma students at NCSA and Agricultural Institute students at NCSU.

*** Does not include out-of-state first-time freshmen majoring in engineering.

^ 2006 is the first year for addition of the writing SAT score. About nine percent of the total first-time freshmen in Fall 2006 and six percent in Fall 2007 and Fall 2008 did not have writing SAT score. Near ten percent of the total first-time freshmen in Fall 2009 did not have writing SAT score.

Note: Extension students are included in the table.
