

Authorization of Tuition for 2013-14

The following RESOLUTION for the 2013-14 academic year reflects the tuition increases recommended by the President after his review of campus tuition proposals. The tuition and fee policy of the Board of Governors provides a framework for the Board to use in reviewing and approving increases in tuition and fees on an annual basis. The Chancellors and their Boards of Trustees requested tuition rate increases consistent with the policy, as well as the Second Four-Year Tuition Plan. The Tuition Plan was established by the Board of Governors at its November 2010 meeting and amended at the September 2012 meeting to remove the minimum set-aside requirement for need-based financial aid.

In February 2012, the Board approved tuition rates for undergraduate resident students for two years (2012-13 and 2013-14). Several campuses are requesting adjustments to the 2013-14 rates as shown on page two.

Proposed increases for professional schools may also include the requested campus-based increase for resident & nonresident grad students and any previously approved increases.

II. Special Tuition Rates

Nonresident Graduate Students

Consistent with the General Statutes and by authorization of the Board of Governors through a resolution passed by the Board in 1983, the campuses are authorized to charge special tuition rates for nonresident graduate students.

For nonresident graduate students that are awarded a graduate teaching or research assistantship and who are paid a stipend of at least \$2,000 per academic year, the institution may award tuition remission to reduce the nonresident tuition rate to the in-state rate. For an example, the nonresident graduate student tuition rate is proposed to increase from \$15,852 to \$16,248 at ASU. ASU graduate nonresident students that are eligible to receive tuition remission will be charged the resident tuition rate, which is proposed to increase from \$4,040 to \$4,303 for the 2013-14 academic year.

Each campus has a state budget for graduate tuition remissions and some campuses supplement state funds from non-state sources. Institutions may not provide graduate tuition remissions to all students. The number of awards is limited to those that meet the criteria and the budget availability.

Effective with the Fall Term of 2013, the special tuition rates for qualifying nonresident graduates are shown on the following two pages. The new rates reflect the tuition increases proposed in Section I.

Note: The 2011 General Assembly eliminated state appropriations for nonresident undergraduate tuition waivers that had been in place since 1983 [Sec. 9.13(b) of S.L. 2011-145].

III. Tuition for Students Enrolled in Degree-Credit Distance Education Courses

Distance education students are charged on a per-credit-hour basis, rather than a “stair-step” methodology charged to regular-term students. The Distance Education per-credit-hour tuition rate is derived by dividing regular term tuition costs by 29.6 for undergraduates and 20.4 for graduate students. Since distance education students are not charged athletic, health, and student activity fees, the cost of education is considerably lower than students that are taking courses using face-to-face instruction.

It is proposed that, effective with the fall semester 2013, resident students and nonresident students taking courses within North Carolina that are enrolled in distance education courses be charged the regular-term tuition rates established in Section I. It is further proposed that tuition rates for these students be implemented on a per-credit-hour basis and that the charge per credit hour be calculated as follows:

- For undergraduate courses, the rate per student credit hour would be the annual rate divided by 29.6 hours.
- For graduate courses, the rate per student credit hour would be the annual rate divided by 20.4 hours.

It is further proposed that the Board delegate to the President the authority to set tuition rates for nonresident students taking courses outside North Carolina. These are students who primarily take courses via the Internet.
