

10. Academic Program Review Workgroup Follow-upChamp Mitchell

Situation: The UNC Policy Manual section 400.1 requires that analysis and recommendation of the need for a new academic program, the place for its establishment, and the method of its delivery shall be based on twelve specified considerations.

Background: The EPPP Committee formed an Academic Program Review Workgroup to address the following two questions: (1) Are the twelve criteria set out in UNCPM sec. 400.1 being adequately investigated, and (2) Does the material reported to the Committee when considering new degree proposals allow it to base its decisions on the specified parameters.

Assessment: The Workgroup has been meeting throughout the Fall semester and has been making regular reports to the EPPP Committee. The Workgroup will further update the Committee at the January meeting, and may bring forward some Recommendations for the Committee's consideration.

Action: This item is for discussion.
