#### **MEMORANDUM**

TO: Members of the Board of Governors Committee on

Educational Planning, Policies and Programs

FROM: Alan R. Mabe

DATE: May 2, 2006

SUBJECT: UNC Nursing Exam Results for 2005 and

Nursing Enrollment and Degrees Conferred Report

## **UNC Board of Governors' Policy and Annual Reporting Requirements**

In May 1990, the University of North Carolina Board of Governors adopted the following policy and performance standards for UNC nursing programs:

A requirement that the president will consider, jointly with the Chancellor, an evaluation of the leadership, faculty, admissions policies and the curriculum of any program whose graduates do not achieve for two consecutive years an annual passing rate of 85% for first-time writers, and, a requirement that the president will ask the Board to initiate program termination procedures for any program having a first-time passing rate of less than 75% for two consecutive years.

This report on enrollment and licensure for the UNC nursing programs is prepared annually in accord with this Board policy. The UNC nursing students who took the NCLEX-RN exam for the first time in 2005 passed at an average rate of 87%. Four UNC campuses had passing rates above 90% (ECU, UNC-CH, UNCG and UNCW). Six of the nine campuses with graduates of prelicensure programs were above the Board standard for passing of 85%.

Three campuses have fallen below 85% passing for two consecutive years (NCA&T, and NCCU, and UNCC) and thus are below the BOG two-year standard. North Carolina A&T State University has fallen below the BOG's 85% standard for six consecutive years while North Carolina Central University has been below the BOG's 85% standard for four consecutive years. UNCC fell below the 85% standard this year.

The Board of Nursing maintains a required passing rate of 75%. NCA&T and NCCU have fallen below that standard, NCA&T for one year and NCCU for two consecutive years. NCA&T's status with the Board of Nursing is Approval with Stipulations. NCCU's status is Provisional Approval.

North Carolina A&T State University. NCA&T has been below the Board standard for six consecutive years. Steps were previously initiated to assist the campus in reversing this trend. A team of consultants visited the campus in the summer of 2002 and prepared a report on steps for improving performance. The campus reviewed the report and reported it was implementing the recommendations. NCA&T provided reports to the Office of the President on July 1 and December 30 of 2003 regarding their efforts. After the 2003 scores were made available, the General Administration asked the campus to go through a process of collecting information from faculty about the program and its organization and leadership resulting in a discussion involving the Provost and the Dean of Nursing with the General Administration regarding steps to be taken to improve the program and student performance. NCA&T provide a report in August 2004 on their internal review of the program and their use of two external consultants, Dr. Pamela Hammond, Dean of the School of Nursing at Hampton University, and Dr. Mary Ellen Graham, of the School of Nursing at Tennessee State University. This report was updated in January 2005 following the conference call with the General Administration in December 2004. The program planed to evaluate students more carefully and not readmit weak students who do not have a very good chance of success. At the same time the program plans to increase the standards for the program and build extra assistance for the students into the program to help all the admitted students be successful. More time is being spent in helping the faculty understand what is required for the NCLEX-RN exam and greater efforts were to be made to make sure those requirements were integrated into the course work. Their plan included curriculum changes in response to recommendations regarding specific courses such as pharmacology and the medical-surgical course. The program comments that many students, who fail the first time, do pass NCLEX-RN subsequently. The changes apparently have not had a positive impact since the passing rate dropped from 81% in 2004 to 69% in 2005.

**Recommendation:** That General Administration identify a national panel of nursing deans to do a through study of the nursing program with the focus on specific actions that can be taken to improve the program and that following the study the institution do quarterly reports regarding the implementation of the actions steps.

North Carolina Central University. NCCU has been out of compliance with the Board standard for four consecutive years and out of compliance with the Board of Nursing's standard for two years and has been has been placed on Provision Approval status by the BON. After the 2002 report to the BOG, the Chancellor and the Provost at NCCU were contacted about a follow up to the report. The options GA suggested were to do have another review by an outside team, or have an internal committee review the last report and determine whether its recommendations were continuing to be followed, since after that report passing rates improved significantly. There was no systematic response to this request, and on March 17, 2004 the General Administration received a letter from the then Provost indicating some steps that had been taken, and also indicating that a letter

had been drafted in August 2003 but apparently had not been sent. In April 2004 following the report on the 2003 pass rates, a letter was sent from the General Administration requesting a thorough review, including a review by the faculty and the Provost. NCCU arranged for a two-day site visit by Dr. Inez Tuck of the School of Nursing, Virginia Commonwealth University, in September 2004, who provided a written assessment of the program. In November 2004, NCCU provided information about the faculty review of the program along with the consultants report. The then Provost left the position before a follow up meeting could be arranged. The Interim Provost was contacted to follow up with previous reviews and to address next steps to respond to the 2004 passing rates. The Interim Provost, now the permanent Provost, began a search process for a new director of Nursing. A new director was hired in late summer 2005. So far there has been no change in passing scores with scores of 65% in both 2004 and 2005.

**Recommendation**: Board policy indicates steps be taken to begin closure of a program when the passing rates are below 75% for two consecutive years. Given the shortage of nurses it may best to have a national study by a national panel of nursing deans focused on action steps to improve the program, with a required implementation report from NCCU on a quarterly basis. Coupled with this would be a requirement that the program size be reduced by 15% each year the NCLEX passing rate is below the Board's 85% standard.

### The University of North Carolina at Charlotte

UNCC has fallen below the Board's 85% standard, even though it improved from a 72% in 2004 pass rate to a 77% pass rate in 2005.

**Recommendation**. UNCC would secure the services of a team of outside deans to assess their prelicensure program and recommend specific steps to be taken to improve the program and the performance of the students on the NCLEX exam.

North Carolina has 65 nursing programs that train Registered Nurses. This includes 11 UNC baccalaureate programs (with new prelicensure programs at FSU and UNCP started in 2005), 44 associate degree programs offered by the North Carolina Community College System; 4 private baccalaureate programs, 3 independent ADN and 3 hospital-based diploma programs. According to the North Carolina Board of Nursing, the total number of students taking the exam from UNC programs increased from 749 in 2004 to 830 in 2005.

#### **UNC Nursing Enrollment**

The baccalaureate-nursing enrollment increased from 2,571 students in fall 2004 to 2,774 in fall 2005. Only upper-division majors are included in the data. Campuses have an additional approximately 1,000 lower division students taking nursing courses and planning to be majors. UNC nursing schools and departments currently offer RN to BSN distance learning programs at sites throughout the state. Some nursing courses are also offered via the internet and through interactive video. The

number of students enrolled in master's programs increased from 923 to 1,027 a sizable increase. The number of nursing students enrolled in a doctoral program reached a new high of 88 (57 at UNC-Chapel Hill and 19 at East Carolina, and 12 at UNCG which opened its new doctoral program in the fall of 2005). UNC graduate programs prepare advanced practice practitioners, nursing specialists, nursing scientists, health administrators and nursing faculty for the UNC and community college programs. Overall enrollment in UNC nursing programs increased by over 9% for fall 2005.

## **UNC Nursing Degrees Conferred**

Over the past ten years, the UNC nursing programs have been responsive to the needs of the state by expanding offerings and increasing capacity as much as possible in programs that have clinical requirements and mandated faculty/student ratios for licensure approval and accreditation. Since 1990 baccalaureate and masters degree production more than doubled. In this decade there has been a slight decline in baccalaureate degrees awarded but that has now turned around. For 2004-05 there were 1,105 baccalaureate degrees awarded, 266 master's degrees and 7 doctorates. The masters and doctorates will contribute to easing the shortage of faculty for nursing programs. The significant increase in enrollment should lead to further increases in graduates in future years.

# **Expanding Nursing Education in UNC.**

The North Carolina Institute of Medicine issued its report on Nursing, *Task Force on the North Carolina Nursing Workforce Report* in May 2004. The Board established a Committee on the Future of Nursing which made its report to the Board in November 2004. Both reports document the need for increasing the number of nurses in North Carolina and increasing the educational level of nurses. UNC campuses are well along in developing enrollment expansion plans to achieve the ambitious goals approved by the Board of Governors to increase the production of nurses at every level.
