

Declaration of Emergency Capital Improvements Project – The University of North Carolina at Chapel Hill

The Chancellor of the University of North Carolina at Chapel Hill has informed the President of the need to invoke emergency procedures as allowed by G.S. 143-129 to make needed repairs by the quickest means possible for the following project.

Declared on May 30, 2006, UNC Chapel Hill would remove four hazardous trees with root and trunk decay as well as replace portions of stone walls that edge Raleigh Road (just South of Franklin Street). The walls had tilted, and a structural analysis had concluded that certain sections were unstable. The existing walls over two feet in height (approximately 290 linear feet) would be replaced by structurally sound walls with a stone veneer. The project, estimated to cost \$426,000, would be funded from Repairs and Renovations funds.

In accordance with emergency procedures, the State Building Commission has been notified.
