

Declaration of Emergency Capital Improvements Project – North Carolina Central University

The Chancellor of North Carolina Central University has informed the President of the need to invoke emergency procedures as allowed by G.S. 143-129 to make needed repairs by the quickest means possible for the following project.

Declared on January 26, 2007, NCCU had an urgent need to replace an uninterruptible power supply (UPS) unit that failed. The UPS unit provided conditioned electrical service and battery backup power to data center servers that supported critical campus operations including classroom instructional systems, campus financial systems, and residence hall card access systems. The project, estimated to cost \$480,000, would be funded from lapsed salary funds.

In accordance with emergency procedures, the State Building Commission has been notified.
