PREFACE

The University of North Carolina presents the thirty-fourth annual Statistical Abstract of

Higher Education in North Carolina. This abstract covers the breadth of higher education activities

in the State in their quantitative aspect, from simple counts of enrollment and degrees conferred

to complex analyses of the flow of student transfers among institutions. This wide range of

information, collected and published annually, should be useful to members of the public and to

planners and educators in educational institutions and government agencies. It is hoped that the

information will aid in the more effective use of resources allocated to higher education.

The data for the abstract were assembled by the Program Assessment and Public Service

Division of the Office of the President of the University of North Carolina from information supplied

by the colleges and universities. I especially wish to acknowledge the work of Dr. Xiaoyun Yang

and James Balfour of the Office of the President staff for their meticulous care in assembling and

editing the abstract and the computing staff for generating data. Acknowledgement is also due to

assisting officials at the institutions, public and private, for their continuing and wholehearted

cooperation. To all, I express my sincere appreciation.

Molly Corbett Broad President
