

SPARC Custom Reporting: American Recovery and Reinvestment Act Proposals

No summary reports currently available from SPARC contain information about ARRA-based proposals. To get information from SPARC about ARRA proposals and awards, a custom report is necessary. Please note that these instructions work only for SPARC administrators. Members of the general public interested in getting information about ARRA proposals and awards can do so using the [ARRA report](#), posted weekly at the UNC ARRA website.

1. Log in to the [SPARC data entry site](#).
2. Select "create custom reports" and then select "Create custom reports for my institution."
3. Select the campus you're interested in, and then the SPARC variables you're interested in, (when selecting variables, be sure to select the "Economic Stimulus" variable, but do not select the "Economic Stimulus (for awards)" variable.
4. Then input desired parameters for your variables; be sure to select the check box next to "Economic Stimulus". This will give you information on any ARRA flagged proposals, within the parameters you set.

Detailed information from all ARRA flagged proposals and awards from all 3 reporting systems (SPARC, RAMSeS, and RADAR) can be found in Sarah Smith's [weekly ARRA report for the UNC system](#).
