VERSION

ACCESSIBLE VERSION

Completing the activities on this screen will highlight the benefits of providing students with helpful structures and overviews.

Building a clear structure for the information you want to communicate to students is a crucial tool in helping them learn. The video below introduces you to a range of different ways of structuring your lectures. As you watch, consider which is most relevant for your own area. You may wish to consolidate your thoughts by completing the 'optional activity'.

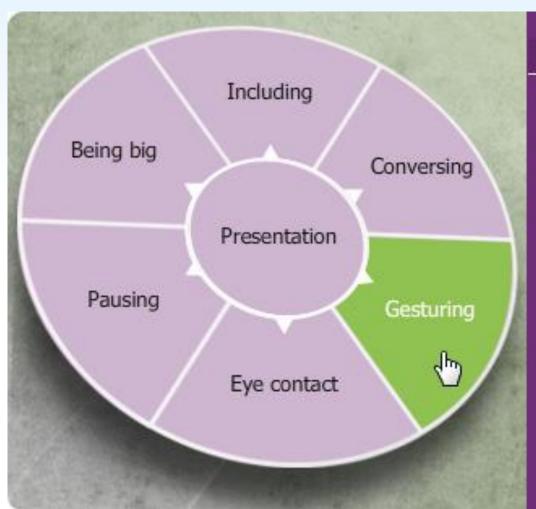

Select one lecture you are planning to give and rearrange it in as many as possible of the

Optional Activity

Epigeum – Interactive Activities

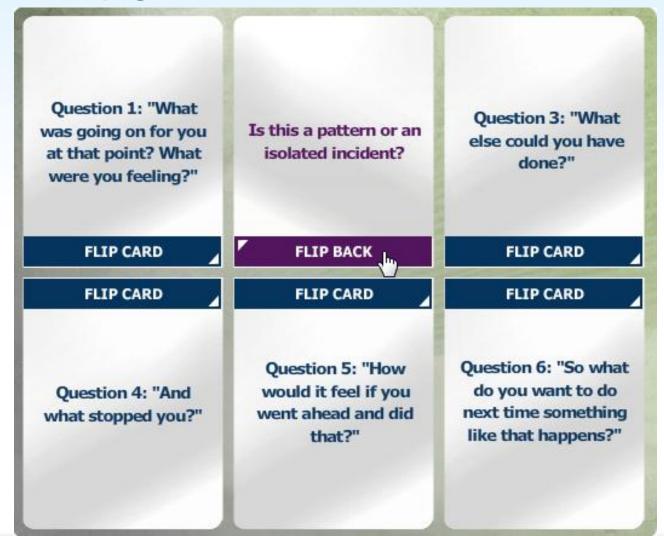

Make conversational gestures

Hand gestures, such as opening both arms with palms outwards toward an individual you are looking at, invites them to engage with you. Such gestures carry powerful communicative messages that we all know and use in everyday conversation and social interaction. Students cannot help but respond to such gestures: they are part of our social make-up.

Epigeum – Interactive Activities

Epigeum - Videos

- A key element of Epigeum courses
- Professionally shot
- Exclusive to Epigeum
- Includes:

Implementing Epigeum Courses Successfully

- LMS installation training provided
- Easily integrated into any LMS
- Blended "hybrid" approach is best combining online and on-ground training
