

7d - Teacher Licensure Program Actions Courtney Thornton

Situation: UNC Asheville and UNC Wilmington have historically created separate and distinct degree programs to track students who pursue teacher licensure in a content area (mathematics, English, etc.). Using codes maintained by UNC General Administration Institutional Research, UNC institutions can track students who pursue teacher licensure concentrations or pathways in any degree program (B.S. in Mathematics, B.A. in English, etc.), thus alleviating the need for institutions to create or maintain separate degree programs for this accounting of students. UNCA and UNCW will continue to prepare teachers in each of the areas listed below; however, upon BOG approval of these program discontinuations, students pursuing teacher licensure will receive the content area degree (and not a degree specific to teacher licensure).
