Academic Degree Programs**

North Carolina State University

- Master of Electrical Engineering (CIP 14.1001)

NC State also offers a Master of Science in Electrical Engineering which has a thesis and non-thesis option. This eliminates the need for this separate non-thesis Master degree program. No students are currently enrolled.

- Master of Specialized Veterinary Medicine (CIP 51.2501)

The content of this degree program is largely encompassed in NC State's existing Master of Science in Comparative Biomedical Sciences. Two students are currently enrolled in Specialized Veterinary Medicine and expected to graduate May 2017.
