

THE UNIVERSITY OF NORTH CAROLINA SYSTEM

REPORT: UNC SYSTEM INTERCOLLEGIATE ATHLETICS & FINANCIAL TRANSPARENCY REPORT 2016-17

May 22, 2018

University of North Carolina System
Chapel Hill, North Carolina

Executive Summary

- A total of 1,252 recruited freshmen student-athletes were enrolled at UNC System institutions in 2016-17:
 - 22 (1.8%) received an exception to the Minimum Course Requirements (MCR)
 - 54 (4.3%) received an exception to the Minimum Admission Requirements (MAR)
- The academic profile of recruited freshmen student-athletes in revenue sports saw improvements across many measures in 2016-17.
- Student-athletes major in a variety of disciplines, the most popular being business, parks, recreation, leisure & fitness, and communications & journalism.
- Six institutions performed as well as or better than the average of their Board of Governors-approved peer institutions, and seven institutions performed as well as or better than the average of their athletic conference peer institutions in NCAA academic success metrics.
- All UNC System institutions met the NCAA's Academic Progress Rate (APR) standards determining eligibility for post-season competition, indicating consistent progress towards graduation for their student-athletes.
- Nine UNC System institutions and 29 sports received NCAA Public Recognition Awards, highlighting teams in the top 10 percent of the most recent APR scores.
- Thirteen UNC System institutions had a total of 86 Level III non-academic violations processed by the NCAA during the 2016-17 academic year.
- Increased academic integrity standards across all UNC System institutions have led to improved academic monitoring of all students and faculty. Regulations include monitoring of student-athlete enrollment, guidelines on independent study courses taught by faculty, strict grade-changing policies, and clear reporting guidelines to inform boards of trustees, chancellors, and faculty representatives of student-athlete activities on campus.
- Financial transparency regulations adopted in 2014 to monitor athletics budgets and institutional expenditures continue to provide senior administrators and policy makers with key financial data to inform athletic and academic decisions and are provided in this report.
- Institutional data in this report have been presented to each institution's board of trustees and approved by all chancellors.

Introduction

The Board of Governors of the University of North Carolina (UNC System) has delegated the responsibility for intercollegiate athletics to chancellors, which includes the required reporting of academic characteristics and performance of the UNC System's student-athletes. This report follows all reporting standards required by the Board and incorporates the following required elements:

- Academic profiles of freshmen student-athletes;
- Majors of student-athletes who have attained at least junior status;
- NCAA academic success indicators;
- Programs receiving NCAA awards or sanctions based on academic performance;
- Comparisons of student-athlete and non-student-athlete GPAs;
- Non-academic violations of NCAA bylaws relevant to student-athletes and prospective student-athletes;
- Athletics department financial information as reported to the NCAA; and
- Athletics fundraising and private foundation activities that support student-athletes and athletic departments.

Academic Profile of Recruited Freshmen Student-Athletes

Exceptions to UNC System Minimum Course Requirements and Minimum Admission Requirements

All admissions to the University, whether for student-athletes or non-student-athletes, are subject to [UNC Policy 700.1.1](#) ("Minimum Course Requirements for Undergraduate Admission") and [UNC Regulation 700.1.1.1\[R\]](#) ("Regulations on Minimum Undergraduate Admission Requirements and the Admission of Students Requiring Special Consideration"). Policies on minimum course requirements (MCRs) and minimum admissions requirements (MARs) set standards for completed high school courses as well as minimum GPA, SAT, and ACT scores for admissions consideration at a UNC System institution. If students do not meet these minimum requirements, they may be admitted only by receiving a chancellor's exception.

A total of 1,252 recruited freshmen student-athletes enrolled at UNC System institutions in 2016-17 and of those students:

- 22 (1.8%) received an MCR exception
- 54 (4.3%) received an MAR exception

Table 1 provides the number of exceptions to the MCRs and MARs for all recruited freshmen student-athletes in 2016-17 by institution, with some information redacted in order to maintain student-athlete privacy.

Table 1: Exceptions to UNC System Minimum Course Requirements and Minimum Admission Requirements, 2016-17

	NCAA Division	Recruited Freshmen Student-Athletes

UNC System Total		1,252	22	1.8	54	4.3

"-" indicates zero student-athletes were reported in this category

***Campus-level data is left blank to comply with FERPA data protection standards. The UNC System Office follows the NCAA standard for FERPA data protections: when institutional data include four or fewer student-athletes and/or when the data combined with publicly-available information could result in the information being identifiable because of a small sample size (four or fewer), this information is not disclosed.

High School NCAA Core Course GPA and SAT/ACT of Recruited Freshmen Student-Athletes

A student-athlete who enrolls as a first-time freshman without any previous full-time college attendance must meet the NCAA's academic requirements (as certified by the NCAA Eligibility Center and approved by the NCAA Executive Committee) and any applicable institutional and conference regulations. Among these academic measures are SAT and ACT scores and the high school grade point average in NCAA-defined high school core courses.¹

A new SAT test was introduced in spring of 2016 across the country, and UNC System institutions had the flexibility to use either the new or old SAT scores in their admissions decision for all students. Very few admissions decisions were based on the new SAT scores for recruited freshmen student-athletes in the 2016-17 academic year, with institutions reporting that new SAT scores were used in admissions decisions for only 22 of the 358 (6%) recruited freshmen student-athletes in the three revenue sports (football, men's basketball, women's basketball). Due to this small number at each institution, the data are not included in the table below to preserve the privacy protections guaranteed by FERPA as interpreted by the NCAA (when data include four or fewer student-athletes and/or when the data combined with publicly-available information could result in the information being identifiable because of a small sample size four or fewer, this information is not disclosed).

Thus, the only data reported below are the average high school GPA in NCAA core courses, average old SAT scores used in admissions decisions, and average ACT scores used in admissions decisions. Table 2 presents this data for 2016-17.

¹ Average high school NCAA core course GPA is based on 16 core courses for Division I schools and 14 core courses Division II schools. For additional information, see: <http://www.ncaa.org/student-athletes/future/core-courses>

Table 2: Average High School NCAA Core Course GPA & SAT/ACT Scores of Recruited Freshmen Student-Athletes, 2016-17

UNC System Total	3.12	917	20	3.13	920	21	3.72	987	20

"-" indicates zero student-athletes or scores were reported in this category

***Campus-level data is left blank to comply with FERPA data protection standards. The UNC System Office follows the NCAA standard for FERPA data protections: when institutional data include four or fewer student-athletes and/or when the data combined with publicly-available information could result in the information being identifiable because of a small sample size (four or fewer), this information is not disclosed.

Selected Majors of Recruited Student-Athletes

The undergraduate academic majors of recruited student-athletes vary. Appendix A provides, by institution, the undergraduate majors of recruited student-athletes from all sports enrolled in fall 2016 achieving at least junior academic standing. The top three subject areas chosen by undergraduate student-athletes make up 46% of all declared majors:

- Business, management, marketing, and related support services (19%);
- Parks, recreation, leisure and fitness studies (16%); and
- Communication, journalism and related programs (11%).

Student-Athlete Academic Success Indicators

Graduation Rates for Student-Athletes

There are several indicators commonly used to measure student-athlete success. The three reported here are the NCAA's Graduation Success Rate (GSR) for Division I schools, the NCAA's Academic Success Rate (ASR) for Division II schools, and the U.S. Department of Education's Federal Graduation Rate (FGR) for student-athletes.

The FGR measures the percentage of first-time, full-time freshmen student-athletes who graduate within six years of enrolling in their original four-year institution. This graduation rate is the same as the traditional six-year graduation rate for all students used by the U.S. Department of Education.

The GSR, ASR, and FGRs measure the six-year graduation rates of student-athletes and are calculated using a four-year rolling average by combining student cohorts. The GSR was developed as an alternative measure to the FGR, as the GSR measures scholarship student-athletes but includes student transfers and allows institutions to exclude student-athletes who leave their institutions prior to graduation as long as they would have been academically eligible to compete had they remained (FGRs do not include them).² The ASR is very similar to the GSR, but the ASR includes student-athlete graduation data regardless of whether or not they received an athletic scholarship.³

Although direct comparisons of institutional GSRs, ASRs, and FGRs are complicated due to the differing methodologies, it can be useful to review how the 15 UNC System institutions with athletics programs compare to their Board-approved peers and those in their respective athletic conferences.

- When comparing UNC System institutions with their Board-approved peers, six UNC System institutions performed as well as or better than their peer institutions when measuring the average GSRs/ASRs.

² For additional discussion on the GSR, visit: <http://www.ncaa.org/about/resources/research/graduation-rates>

³ For additional discussion on the ASR, visit: <http://www.ncaa.org/about/resources/research/academic-success-rate-asr>

- A comparison of the average GSRs/ASRs of UNC System institutions with their athletic conference peers show that seven UNC System institutions performed as well as or better than the peer institutions.

Institutional GSRs, ASRs, and FGRs are provided alongside their Board-approved and athletic conference peers in Appendix B. These success rates are also available and organized by sport for all NCAA institutions from the NCAA directly:

- NCAA GSR database: <https://web3.ncaa.org/aprsearch/gsrsearch>
- NCAA ASR database: <https://web3.ncaa.org/aprsearch/asrsearch>

NCAA Academic Progress Rates for Student-Athletes

The Academic Progress Rate (APR) is an NCAA Division I metric developed to track academic achievement by academic teams and is used to determine in-season or post-season penalties. The APR was developed by the NCAA to report on graduation rates, with a score of 930 declared as the minimum threshold for academic achievement.⁴ Thus, if a team has less than a 930 APR, the NCAA considers the student-athletes to be making insufficient academic progress and the sport can be penalized. The NCAA's APR reports for all UNC System Division I institutions can be accessed from the APR database: <https://web3.ncaa.org/aprsearch/aprsearch>.

The APRs are released each year and indicate any penalties or awards for an institution's sports teams. Due to the nature of the APR reporting cycle, they reflect the scores of the graduating class a year in the past. This information is then used to determine penalties, which include in-season limits on practice time or post-season championship eligibility.⁵

APRs for 2017-18 Championship Year

The latest APR scores were released by the NCAA in May 2017 and are based on four years of data covering student-athlete cohorts entering in 2012-13, 2013-14, 2014-15, and 2015-16. For the 2016-17 NCAA championship year, all UNC System institutions had team APRs above the 930 threshold; thus, no institutions received penalties.

APR Awards for Academic Success

The NCAA annually recognizes teams that have high APR scores. Table 3 presents the UNC System institutions and sport(s) receiving NCAA Public Recognition Awards, which highlight the top 10 percent of teams nationally in each sport based on the most recent APR scores. The UNC System has nine institutions and 29 sports receiving recognition. System-wide, this is the highest number of sports singled out for Public Recognition Awards in over five years.

⁴ According to the NCAA, an APR of 930 is equivalent to a 50% graduation rate for the cohort.

⁵ Please visit the NCAA APR explanation page for additional information and detail: <http://www.ncaa.org/about/resources/research/division-i-academic-progress-rate-apr>

WCU	Men's Golf

Non-Academic NCAA Violations

Along with monitoring the academic work of student-athletes according to the APR, the NCAA strictly monitors breaches of conduct that “seriously undermine or threaten the integrity of the NCAA Collegiate Model...” (NCAA, 2013). There are four levels of violations, ranging from severe (Level I, e.g. substantial impermissible benefits) to incidental (Level IV, e.g. inadvertent, isolated infractions). Incidents of Levels I and II violations are shared with the public by the NCAA while Level III violations are

heavily redacted and only shared upon request. Level IV violations are reported by institutions to their respective athletics conferences. For the 2016-17 academic year, the NCAA did not process any Level I or Level II violations at UNC Systems institutions.⁶

Thirteen of the 15 UNC System institutions with student-athletes had a total of 86 Level III violations processed by the NCAA during the 2016-17 academic year (two Division II schools did not report any violations). Examples of Level III violations include coaches calling prospective student-athletes during periods of time where communications are impermissible and athletics teams practicing more than the allotted time during a particular week. The NCAA provided summaries of the violations and rulings without identification, per NCAA disclosure rules, to the UNC System Office to assist with the System's monitoring and compliance role in this area.

A summary of Level III violations processed over the last three academic years appears below in Table 4.

Table 4: Annual Summaries of NCAA Level III Violations at UNC Institutions

Year	Total Number of UNC System	
	Institutions with Level III Violations Processed	Total Number of Level III Violations Processed
2016-17	13	86
2015-16	14	94
2014-15	12	119
2013-14	13	132

Academic Integrity at UNC System Institutions

Academic Integrity Regulations

As part of the UNC System's ongoing efforts to monitor and protect the integrity of its curriculum and academic records, each institution was required to develop practices and procedures to implement the academic integrity regulations adopted by the Board in April 2013. Many institutions were proactive in their monitoring of academics, developing policies well in advance of the adoption of [UNC Regulation 700.6.1\[R\]](#) in 2013. The regulations follow the recommendations from multiple task forces, studies, and extensive discussions with various stakeholders. The data required by UNC Regulation 700.6.1[R] are divided into four functional areas:

- Registrar and Student Records Best Practices
- Evaluating the Academic Performance of Student-Athletes and Other Student Subgroups

⁶ Additional details regarding the NCAA violation structure can be found here: <http://www.ncaa.org/about/resources/media-center/news/new-violation-structure>

- Review and Approval of Nonstandard Course and Course Sections
- Supervision and Evaluation of Faculty and Faculty Administrators

Student-Athletes, Academics, and Institutional Procedures

[UNC Guideline 700.6.1.1\[G\]](#) requires that institutions conduct course clustering and transcript review analyses to identify any anomalies that may be present among student-athletes. Specifically, institutions reviewed all courses and flagged any course where student-athletes make up 25% or more of course section enrollment (this is identified as “course clustering” of student-athletes). If course enrollment did consist of 25% or more student-athletes, the course was flagged for additional review and the grade distribution of student-athletes and non-student-athletes in the course section was reviewed for significant differences between these two groups. Additionally, any student-athletes who were found to be in three or more flagged courses had their transcripts reviewed to ensure that no academic irregularities occurred.

In the reviews of course clustering and transcripts, no abnormalities were identified and all institutions report being in full compliance with this policy. Additionally, each institution is required to compare the overall student-athlete GPA with the overall non-student-athlete GPA (undergraduates only). Table 5 presents the results for this GPA analysis for the spring 2017 term.

Table 5: Student-Athlete and Non-Student-Athlete GPA, Spring 2017

	Student-Athlete GPA	Non-Student Athlete GPA
ASU	3.01	3.19
ECU	3.03	2.96
ECSU	2.73	2.80
FSU	2.80	3.03
N.C. A&T	2.87	2.75
NCCU	2.98	2.77
NCSU	2.95	3.18
UNCA	3.18	2.95
UNC-CH	3.02	3.27
UNCC	2.99	3.02
UNCG	3.20	2.95
UNCP	2.78	2.66
UNCW	3.22	3.15
WCU	2.98	3.10
WSSU	2.68	2.82

Athletics Financial Transparency Regulations

[UNC Regulation 1100.1.1\[R\]](#) requires specific financial reporting to monitor athletics budgets and institutional expenditures and ensures that all UNC System chancellors, boards of trustees, the president, and Board of Governors will receive the necessary data when considering the balance between athletics and academics at each constituent university. The data in Appendix C were collected from the NCAA Institutional Performance Program (IPP) dashboards and reported by each institution. The data in this report produced by the UNC System Office are slightly different than what was made available in years past. The NCAA has phased out its financial dashboards (the source of prior years' data and where UNC System staff pulled data directly) in favor of the IPP dashboards, which utilize some different metrics and data points in their reporting. The data in Appendix C is for the most recent year available (2015-16) and reflects content similar to what was previously reported.

Athletics Fundraising and Private Foundations

Thirteen of the UNC System institutions have established private foundations (or “booster clubs”) for the purpose of providing resources to enrich various programs of the constituent institutions. Only ECSU and WSSU do not have formal booster clubs.

These private organizations are subject to [UNC Regulation 600.2.5\[R\]](#), which requires an annual independent audit be performed and reported to the institution’s board of trustees and that a copy be provided to the president to be reviewed by UNC System leadership. In addition to UNC Regulation 600.2.5[R], booster club organizations have increased reporting requirements under [UNC Regulation 1100.1.1\[R\]](#), including providing copies of their most recent financial information and external audit (as submitted to their boards of trustees). Additionally, institutions provide their booster clubs’ official operating procedures to the UNC System Office as part of their reporting requirements.
