**May 21, 2019**

**UNC System Report on Overhead Receipts  
[Facilities and Administrative (F&A) Receipts]  
2017-18**

Legislation enacted by the 2013 General Assembly (S.L. 2013-360) included the following special provision directing the Board of Governors to report annually on the amount and uses of facilities and administrative receipts:

**UNC BOARD OF GOVERNORS REPORT ON OVERHEAD RECEIPTS**

**SECTION 11.6.**(a) G.S. 116-11 is amended by adding a new subdivision to read: “(9a) The Board of Governors shall report to the Joint Legislative Education Oversight Committee and the Office of State Budget and Management by March 1 of each year regarding the sum of facilities and administrative fees and overhead receipts for The University of North Carolina that are collected and expended by each constituent institution. The report shall include all of the following information:

- a) The collection of facilities and administrative fees and overhead receipts by grant or program.
- b) The use of facilities and administrative fees and overhead receipts showing expenditures by grant or program.
- c) The sum of facilities and administrative fees and overhead receipts collected or expended by each constituent institution for maintenance and operation of facilities that were constructed with or at any time operated by funds from the General Fund.”

In response to that legislation, this report covers the state fiscal year ending June 30, 2018.

**Background**

The University of North Carolina System serves the state's interests through a three-part mission of teaching, research, and public service. UNC's reputation as one of the nation's top public university systems has been built, in part, on the volume and quality of research and sponsored programs conducted by its faculty. With limited direct state appropriations for research, the University has depended heavily on obtaining competitive grants and contracts to support research efforts.

In recent decades, the federal government has increased efforts to promote scientific research at United States universities, as well as research conducted by federal, nonprofit, and commercial laboratories. Recognizing that research carries necessary administrative, facilities, and other expenses above and beyond the direct costs of the project, federal agencies have included in research grants and contracts a portion of funds to help offset these related costs – commonly called "indirect costs," "overhead receipts," or "facilities and administrative (F&A) receipts." In keeping with current federal reporting practices, the term “facilities and administrative (F&A) receipts” is used for the remainder of this report.

Under Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), facilities and administrative receipts generally reimburse costs associated with supporting

contract and grant activities of the institution in a manner consistent with the formulas under which the funds were recovered. Internal university controls pertaining to the compliance requirements for sponsored project expenditures under Uniform Guidance Subpart F *Audit Requirements* are designed to provide reasonable assurance regarding the achievement of the following objectives:

1. Transactions are properly recorded and accounted for in order to permit preparation of reliable financial statements and reports and to maintain accountability over assets.
2. Transactions are executed in compliance with laws, regulations, and provisions of federal and state laws and in accordance with sponsored agreement terms.
3. Funds, property, and other assets are safeguarded against loss from unauthorized use or disposition.

Research and other sponsored program awards to the 16 UNC System institutions of higher learning and the North Carolina School of Science and Mathematics totaled nearly \$1.42 billion for FY 2017-18. For the year, about three-quarters of research and sponsored program awards came from federal sources, with about 24% from private industry and nonprofit organizations, while state and local governments provided about 4% of the receipts. Every \$1 million of research supports a total of fifteen jobs.<sup>1</sup> That does not take into account the economic impact of inventions, patents, or spin-off companies started by University researchers.

Contracts and grants support thousands of individual projects that improve human health, understanding of the natural world, education, national defense, and other areas critical to the nation and state. Grants and contracts support not only leading-edge science and public service but also the state's workforce. Contracts and grants support salaries for faculty, post-doctoral fellows, staff, graduate assistants, and undergraduate researchers, all of whom keep the University of North Carolina System in the forefront of regional economic development and training.

In 2017-18, the UNC System earned a total of \$267.2 million in facilities and administrative receipts (Attachment A). F&A receipts were expended by each campus to support costs associated with maintaining an environment conducive to conducting research and scholarly advancement and ensuring competitiveness for attracting additional research funds. In 2017-18, the UNC System expended a total of \$247.7 million of these facilities and administrative receipts (Attachment B). It is important to note that F&A receipts and expenditures for a given year are often not the same due to timing differences between receipts and expenditures and planning F&A receipt-supported projects.

UNC System institutions also expended \$53 million of F&A receipts to operate or maintain facilities constructed with or operated by general fund appropriations (Attachment C).

<sup>1</sup> This information was provided by an economic impact study completed by Economic Modeling Specialists International issued in February 2015 based on FY 2012-13 information. See <http://www.northcarolina.edu/economic-impact-2015> for more information on the study.

### **Amount of Facilities and Administrative Receipts**

University-wide, a total of \$267.2 million was earned in facilities and administrative receipts during the 2017-18 fiscal year. Consistent with their research missions, the two major research universities, North Carolina State University at Raleigh (20.3%) and UNC-Chapel Hill (68.0%), accounted for 88.3% of the University-wide total. Receipts for seven institutions – Appalachian State University, East Carolina University, North Carolina A & T State University, North Carolina Central University, UNC Charlotte, UNC Greensboro, and UNC Wilmington – accounted for most of the remaining F&A receipts. Research has increased at these seven institutions, which has translated into increased facilities and administrative receipts.

### **Uses of Facilities and Administrative Receipts**

Facilities and administrative receipts are expended in a manner consistent with the earning rates negotiated with the federal government to recover a part of the actual costs of conducting federally sponsored research that are otherwise not reimbursable from grants and contracts.

The principal priorities for programmatic expenditures were designed to:

- maintain and expand research infrastructure
- provide matching funds/cost-sharing for external grants
- support research-related administrative functions
- encourage new research activity
- foster research/creative activity in the classroom
- provide for research support and assistantships
- promote grantsmanship education
- fund faculty "start-up" packages (support staff, laboratory facilities, equipment, and operating expenses)
- sustain academic programs, including the libraries
- provide for capital improvements and debt service
- support strategic initiatives
- provide scientific equipment

Each of the institutions also reported on the purpose of its expenditure priorities for the year in one of the twelve following programs:

<b>Program</b>	<b>Expenditures</b>
Institutional Support	\$ 71,276,978
Organized Research	64,478,947
General Academic Support	47,797,056
Regular Term Instruction	29,588,355
Physical Plant	21,873,567
Multi-Activity (Transfers to Capital)	5,118,874
Libraries	3,456,165
NC State Veterinary Medicine	1,428,608
Student Services	1,298,905
Student Financial Aid	882,633
Community Services	296,962
School of Government	162,292
<b>Total</b>	<b>\$247,659,342</b>

In addition to the programmatic summary, each institution also provided an accounting of how F&A receipts were spent in FY 2017-18. Across the UNC System, expenditures and percentages of each were categorized as follows:

<b>Expenditures</b>	<b>Amount</b>	<b>Percent of Total</b>
Personal Services	\$ 99,912,765	40%
Purchased Services	55,411,498	22%
R&R Construction Debt Service	39,461,342	16%
Other Expenses & Adjustments	20,870,091	9%
Property, Plant, & Equipment	18,245,836	7%
Supplies	10,913,820	5%
Aid & Public Assistance	2,843,990	1%
<b>Total</b>	<b>\$ 247,659,342</b>	<b>100%</b>

Expenditures by UNC-Chapel Hill and North Carolina State University account for 86% of the total F&A expenditures. The University as a whole earned more F&A receipts than were spent during 2017-18, increasing the F&A fund balance by just under \$20 million. System-wide F&A receipts supported approximately \$96 million of fund balance (net) on June 30, 2018. UNC-Chapel Hill's ending fund balance as of June 30, 2018 was \$1.6 million.

**Conclusion**

Facilities and administrative receipts are expended to support costs associated with maintaining an environment conducive to research and scholarly advancement and ensuring competitiveness for attracting additional research funds. Specifically, these funds support the staff and operating costs for research functions; audit and compliance related to grants and contracts; facilities and equipment repairs and maintenance; debt service for facilities that provide research space; maintenance and operation of the physical plants and offices that provide support to the universities' research endeavors; and investment in libraries to maintain current research related collections and services. F&A funds are increasingly important as University research is a critical and growing economic driver for the State of North Carolina.
