

ADMINISTRATIVE MEMORANDUM

SUBJECT Average 15-Hour Requirement for Full-Time Undergraduates

NUMBER 345

DATE May 10, 1994

This memorandum sets annual goals and establishes guidelines for campuses to be in compliance with the Board's 1993 Plan to Improve Graduation Rates and to meet the Board's expectation that undergraduates enroll in at least 15 semester hours per term in order to graduate in four years. These annual goals and guidelines will also put each campus in compliance with Section 89 (a), Senate Bill 27, of the 1993 Session Laws which states:

In order to monitor institutional progress in meeting the expectation of Item 1 of the "Plan to Improve Graduation Rates in the University of North Carolina" that full-time undergraduates will take an average of 15 semester hours per term, the Board of Governors shall require constituent institutions to set a goal of increasing to 15 the average number of credit hours per term taken by full-time undergraduates. This goal shall be met systemwide and by each constituent institution no later than December of 1997. The Board shall instruct all institutions to report on their progress in meeting their goals in their annual assessment reports. The Board shall require those institutions failing to make timely progress to submit special reports identifying additional steps to be taken. The Board shall report annually by April 1 to the Joint Legislative Education Oversight Committee on the progress of each constituent institution in meeting these goals.

It should be noted that neither the Board's expectation nor this requirement changes the definition of a full-time undergraduate courseload from 12 to 15 credit hours, nor do they require that every full-time undergraduate carry 15 or more credit hours. Instead, they require that the courseloads of full-time undergraduates average at least 15 credit hours. Monitoring of the legislative requirement will be based on all regular session degree-creditible and remedial course hours taken by degree-seeking undergraduates as reported on your institution's fall and spring Student Data Files.

Reporting Schedule

The Board is required to report annually each spring on the progress of each institution in meeting its December 1997 goal. In order to include the most current data in the annual report, while at the same time allowing sufficient time for responses from campuses not meeting goals to be prepared and summarized, the following schedule will be followed.

An average annual credit hour count for full-time undergraduates will be calculated in November of each year. It will include the credit hours reported on the spring and fall Student Data Files of that calendar year (not academic year). After the November calculation is made, any institution whose count is below its annual goal will be asked to report by the end of the following January on corrective steps to be taken in the new calendar year. Following receipt of the campus reports, a report will be prepared for Board approval and for submission to the Legislature before April 1.

Use of calendar year, instead of academic year, data is dictated by the December 1997 deadline for achieving the 15-hour average and by the need to file annual reports, subject to Board review and approval, before April 1 of each year. It will permit us to include spring 1997 and fall 1997 data in our final calculation.

Annual Goals

Attached to this memorandum is a table entitled UNC Board of Governors Report on Average Credit Hours Taken by Full-Time Degree-Seeking Undergraduates (As required by Section 89 (a), Senate Bill 27, 1993 Session Laws). It presents data on average annual credit hour counts for UNC institutions in 1993 (based on spring '93 and fall '93 data). It also presents annual goals for each institution between 1993 and 1997. Institutions above the 15-hour average in 1993 are required to maintain an average of 15 hours or more in each of these years.

A handwritten signature in black ink, appearing to read "C. D. Spangler, Jr.", is written over a horizontal line.
