Preface

Statutes requiring the licensing of certain institutions which conduct degree activity in North Carolina have been part of the laws of North Carolina for many years. From 1923 to 1963, the State Board of Education licensed nonpublic educational institutions to confer degrees in the State. In 1963, the General Assembly transferred this responsibility to the State Board of Higher Education. In 1972, the General Assembly dissolved the State Board of Higher Education and assigned the responsibility to the newly created Board of Governors of the University of North Carolina. The responsibility is one of several duties extending beyond the Board’s governance of the University’s 16 constituent institutions.

On February 8, 1974, the Board adopted Rules and Standards of the Board of Governors of the University of North Carolina Relating to the Issuance of Licenses to Nonpublic Educational Institutions to Confer Degrees. The standards, to a significant extent, were based on a legislative model proposed in 1973 by the Education Commission of the States. In February 1976, the Board adopted a revision of the Rules and Standards and in September 1985 adopted a further revision reflecting statutory changes enacted by the 1984 Session of the General Assembly.

The rewritten 1984 statute [G.S. 116-15] is titled “An Act to Rewrite the Statute under Which Nonpublic Post-Secondary Educational Institutions May Be Licensed to Conduct Post-Secondary Degree Activity in North Carolina.” The statute essentially defines the jurisdiction of the Board of Governors of the University of North Carolina as covering “post-secondary degree activity” and places in the statute itself standards for licensing that are substantially those previously adopted by the Board of Governors.

By placing the Board’s former licensing standards in the statute itself and empowering the Board with appropriate authority to administer provisions of the statute, the 1984 General Assembly clearly intended for post-secondary degree activity to be carefully overseen in North Carolina. The 1984 licensing statute also provides for periodic as well as unspecified or ad hoc review of institutional compliance with licensing standards. It empowers the Board of Governors to establish those rules, regulations, and procedures deemed necessary or appropriate to effect licensing provisions. The Board of Governors is authorized to revoke the license of an institution if standards are not maintained.

In October 1998, the Board adopted revisions to the guidelines in order to recognize the growing importance of distance learning in the delivery of degree-credit instruction.

In November 2004, the Board of Governors approved revisions to the Rules and Standards for Licensure. The revisions focused on clarity and specificity for general education, educational credentials, catalog material, transfer of credits, and library guidelines to reflect access to online resources. These revisions are guided by the General Assembly’s statutory requirement to ensure an “education of good quality” (116-15, 4).

This publication combines into one document the licensing standards prescribed by the statutes, the Board’s guidelines for interpreting the standards, and the rules, regulations, and procedures under which the Board issues licenses to institutions to conduct post-secondary degree activity in North Carolina.

The total effort reflects the General Assembly’s “recognition of the importance of higher education and of the particular significance attached to the personal credentials accessible through higher education....”
I. Authorization

The General Statutes of the State of North Carolina specify that the powers and duties of the Board of Governors of the University of North Carolina, in addition to those related to governance of the constituent institutions of the University, include regulatory authority to issue to certain nonpublic post-secondary educational institutions licensure to conduct post-secondary degree activity in North Carolina. The statute pertaining to such licensing, North Carolina General Statutes Section (G.S.) 116-15, is reproduced as Appendix A.

II. Purpose

The purpose of the rules and standards relating to the issuance of licenses to conduct post-secondary degree activity is to assure prospective and enrolled students and the citizens of North Carolina that nonpublic post-secondary educational institutions operating wholly or in part in North Carolina have demonstrated that their instructional curriculum, faculty, library resources, personnel, student services, facilities and equipment are combined to provide students an education of good quality1.

III. Definitions

As used in these rules and standards the following terms are defined.

‘Post-secondary degree’

A credential conferring on the recipient thereof the title of “Associate,” “Bachelor,” “Master,” or “Doctor,” or an equivalent title, signifying educational attainment based on (1) interactions between faculty and students following a coherent course of study with specified student outcomes, and/or (2) a coherent course of study in which the student and instructor are not in the same place delivered either synchronously or asynchronously with specified student outcomes and faculty-student interaction mediated through electronic means, or (3) a combination of the foregoing; provided, that ‘post-secondary degree’ shall not include any honorary degree or other so-called ‘unearned’ degree. The content and rigor of the curriculum for the degree must be at a level to assure an education of good quality.

1 In revising the Rules and Standards, we consulted several individuals and used the principals and standards of the Commission on Colleges of the Southern Association of Colleges and Schools as a guide in several sections. The use of and references to its principals and standards are done with the permission of the Commission on Colleges though the use of these materials in this context relates solely to licensure and is unrelated to the issue of accreditation of an institution.
‘Institution’
Any sole proprietorship, group, partnership, venture, society, company, corporation, school, college, or university that engages in, purports to engage in, or intends to engage in any type of post-secondary degree activity.

‘Instruction’
Delivery of a coherent and formal plan of study constructed for students so that they can demonstrate specific learning outcomes.

‘Post-secondary degree activity’
Any of the following is ‘post-secondary degree activity:’

(1) Awarding a post-secondary degree.

(2) Conducting or offering study, experience, or testing for an individual or certifying prior successful completion by an individual of study, experience, or testing, under the representation that the individual successfully completing the study, experience, or testing will receive credit, at least in part, toward a post-secondary degree.

Post-secondary degree activity includes conduct with respect to either a complete post-secondary degree program or any study or experience or testing represented as creditable toward a post-secondary degree.

An institution undertakes post-secondary degree activity in this State when it commences the activity by:

a. Use of employees or agents within North Carolina; or
b. Transmission, presentation, or dissemination of information over or through electronic equipment that is located in North Carolina and owned, leased, rented, licensed, or otherwise reserved for use by the institution; or
c. Use of real property or facilities that are located in North Carolina and owned, leased, rented, licensed, or otherwise reserved for use by the institution; or
d. Agreement with a third party to transmit, present, or disseminate information on behalf of the institution through any of the means described in a, b, or c, above.

‘Publicly registered name’
The name of any sole proprietorship, group, partnership, venture, society, company, corporation, school, college, or institution that appears as the subject of any Articles of Incorporation, Articles of Amendment, or Certificate of Authority to Transact Business or to Conduct Affairs, properly filed with the Secretary of State of North Carolina and currently in force.

‘Board’
The Board of Governors of the University of North Carolina.

‘Licensure’ and ‘accreditation’
The Board of Governors as agent of the State regulates nonpublic post-secondary degree activity in North Carolina through a licensing process. Licensure is required by law. Accreditation, on the other hand, is not a requirement of law; it is a status sought voluntarily by an institution from a group of
peer institutions and is accomplished by a voluntary, nongovernmental body called an accrediting commission.

State licensure fulfills a consumer protection function, protecting potential and enrolled students and employers, as well as the public in general. It substantiates minimum educational quality and is prerequisite to, among other things, receipt by institutions and their students of sizeable sums of public funds derived from the taxing power of the State. Accreditation commissions also provide consumer protection, but their primary purpose is to serve those institutions that called them into being.

Normally, state licensure precedes accreditation; and it is the first requirement an institution must meet in North Carolina to be eligible for accreditation and for various programs of the United States Office of Education and other federal student financial aid agencies.

Evidence submitted by an institution in support of accreditation may be submitted in support of receiving or maintaining licensure provided that the institution can demonstrate such evidence to be relevant to licensure standards. The weight of evidence derived from accreditation is evaluated by the Board of Governors just as all other information and documents submitted.

‘Credit hour’
A credit hour is the unit by which an institution may measure its instruction. The number of credit hours assigned to a course is usually defined by the number of hours per week in class and the number of weeks in the session. One credit hour is usually assigned to a class that meets at least 50 minutes a week over a period of a semester, quarter, or term; in laboratory, field work, drawing, music, practical arts, physical education, or similar type of instruction, one credit hour is assigned for a session that meets 2 or 3 hours a week for a semester, quarter, or term. Quarter credit hours and semester credit hours are the two most common systems of measuring course work. Institutions on the trimester plan generally use the semester credit hour system. Courses offered in a calendar other than semester or quarter, including summer sessions, may be measured in term credit hours or stated in semester credit hours or quarter credit hours.

A semester credit hour is a credit hour based on the semester calendar, which is usually divided into terms of 17 weeks. A quarter credit hour is a credit hour based on the quarter calendar, which is usually divided into terms of 11 weeks.

‘Distance education’
A coherent course of study in which the student is at a distance from the campus and the instructor may or may not be in the same place as the student; in addition to face-to-face instruction at a distance, instruction may be delivered either synchronously or asynchronously through electronic means (e.g., online courses, Web enhanced courses, two-way interactive video, etc.).

Distance education delivered pursuant to a State Authorization Reciprocity Agreement to which the State of North Carolina is a party shall be exempt from licensure requirements.

‘Standards’
The standards and guidelines for education of good quality delineated in this publication. Standards are based on the North Carolina General Statute 116-15.
IV. Standards and Guidelines

To be licensed to conduct post-secondary degree activity in the State of North Carolina, a nonpublic post-secondary educational institution shall satisfy the Board of Governors that it meets the standards as specified by G.S. 116-15(f) and has demonstrated that its academic programs meet the Board of Governors’ standards for an education of good quality. The Board of Governors’ standards and guidelines for interpreting the standards follow. The guidelines are provided to inform, to guide, and to furnish clarification for an institution seeking to meet the standards and to assist examiners and staff of the University in making judgments concerning the institution’s compliance with the standards.

**Standard 1**
*(Charter)*

The institution must be state-chartered. If chartered by a state or sovereignty other than North Carolina, the institution shall also obtain a Certificate of Authority to Transact Business or to Conduct Affairs in North Carolina issued by the Secretary of State of North Carolina. [G.S. 116-15(f)(1)]

**Guidelines**

**A. Chartering Agent**

The Secretary of State of North Carolina charters institutions in North Carolina as well as issues Certificates of Authority to Transact Business or to Conduct Affairs in North Carolina.

The address of the Secretary of State is:

Secretary of State of North Carolina  
2 South Salisbury Street  
Raleigh, North Carolina 27601-2903  
[www.secretary.state.nc.us](http://www.secretary.state.nc.us)

**B. Availability of Articles of Incorporation**

A copy of the articles of incorporation and all amendments thereto of the institution must be on file in the office of the chief executive officer of the institution and available for review on request during normal working hours by any person. If the institution is chartered outside North Carolina, a copy of the Certificate of Authority to Transact Business or to Conduct Affairs in North Carolina must also be on file in the office of the chief executive officer and be available for review by any person.

**C. Publication of Contact Information**

The address, telephone number, electronic email address, Website, and other pertinent contact information of the institution, and of the principal office of the corporation, must be published in the catalog of the institution.
D. Availability of Articles of Incorporation of Controlling Corporation(s)

If the corporation is controlled, directly or indirectly, by one or more other corporations, a copy of the articles of incorporation and amendments thereto of each such corporation must also be on file in the office of the chief executive officer of the institution and be available for review by any person.

E. Publication of Governing Board Membership of Controlling Corporation(s)

The membership of the governing board of the institution as well as the name and membership of the governing board of any other corporation or corporations which may control, directly or indirectly, the institution must be published in the catalog of the institution. The intent of this guideline is to make known the name and membership of the governing board of the ultimate controlling corporate entity of the institution and, if any, all intermediary controlling corporations.

F. Institutions Seeking to Conduct Post-Secondary Degree Activity Electronically

Institutions seeking to conduct post-secondary degree activity electronically in the State of North Carolina must be authorized to operate in the state where the instructional activity originates.

Standard 2
(Period of Operation)

The institution must have been conducting post-secondary degree activity in a state or sovereignty other than North Carolina during consecutive, regular-term academic semesters, exclusive of summer sessions, for at least the two years immediately prior to submitting an application for licensure under this section, or must have been conducting with enrolled students, for a like period in this State or some other state or sovereignty, post-secondary educational activity not related to a post-secondary degree; provided, that an institution may be relieved temporarily of this standard under the conditions set forth by the Board of Governors. [G.S. 116-15(f)2 and G.S. 116-15(i)]

Guidelines

An institution which meets standards for licensure except for having conducted post-secondary degree activity for at least the two years immediately prior to submitting an application for licensure may be granted an interim permit to conduct post-secondary degree activity if the institution can demonstrate a quality of stability, experience, reputation, and performance which two years of operation would normally denote. After a period of one year, the institution may be evaluated to determine if the institution is still qualified for a provisional license or qualifies for a regular license.

Standard 3
(Program of Study)

The substance of each course, program of study, equivalent experience, or achievement test must be such as may reasonably and adequately achieve the stated objective for which the study, experience, or test is offered in order to be certified as successfully completed. [G.S. 116-15(f)(3)].
Guidelines

The program of study offered by an institution must reflect and support the mission of the institution and achieve the stated objectives. The institution shall have a clearly defined and published mission statement specific to the institution and appropriate to a post-secondary institution. Its governing board shall approve an institutional mission statement; and it shall be periodically reviewed by that board. The academic program must include provisions for a general education curriculum and specific fields of study at the associate, baccalaureate, or advanced level as appropriate for the mission of the institution.

A. Courses

The institution shall have an academic curriculum that is designed to reasonably and adequately achieve its mission and educational objectives. The institution shall demonstrate that each academic program for which academic credit is awarded is a) approved by the faculty and the administration and b) evaluated annually to determine its effectiveness.

Course objectives, prerequisites, the plan of instruction, requirements, and procedures for evaluation must be clearly stated and available to current and prospective students in a written course syllabus.

An institution must provide for annual evaluation of course and program effectiveness including assessment of student learning, retention, and graduation rates, and student and faculty satisfaction.

B. Distance Education

Academic standards for courses delivered off-campus or electronically must be the same as for courses delivered at the institution where they originate. The quality and content of each course, regardless of the mode of delivery, must be such as may reasonably and adequately achieve the stated objective. Appropriate data should be used to determine comparability.

Such reviews are to demonstrate that student learning outcomes and satisfaction in distance courses delivered electronically are comparable to student learning outcomes and satisfaction in courses offered at the campus where they originate. The technology being used should be appropriate to meet course objectives.

Instruction employing distance-learning technology must ensure appropriate interaction between students and faculty and among students.

C. General Education

The institution shall offer a general education program at the collegiate level that is a substantial component of each undergraduate degree, ensures breadth of knowledge, and is based on a coherent rationale. One or more courses, or their equivalencies, shall be taken from each of humanities/fine arts, social/behavioral sciences, and natural science/mathematics. The institution shall identify appropriate general education competencies, and shall provide evidence that graduates have attained those competencies.
D. Duration and Intensity

The program of instruction must include educational activities extending over a sufficient period of time and in sufficient intensity to fulfill the mission and academic goals of the institution. The academic year, regardless of its organization, is normally at least 30 weeks in duration.

E. Associate Degree

Each educational program leading to an associate degree shall include a general education component at the collegiate level that is a substantial component of each degree, ensures breadth of knowledge, and is based on a coherent rationale. For degree completion in associate programs, the general education component constitutes a minimum of 15 semester hours or the equivalent. The associate degree program normally consists of courses carrying a minimum of 60 semester credit hours or 90 quarter hours or the equivalent in instructional activities as measured by the institution. The associate degree program normally requires full-time attendance for two academic years or the equivalent but an institution may award the associate degree to students who have completed the course requirements at an accelerated pace or can otherwise demonstrate that they have met the measurable objectives of the program.

The following associate degree designations as defined are acceptable:

(a) The Associate in Arts (A.A.) degree—awarded to those who successfully complete programs that emphasize the liberal arts and/or the fine and performing arts. Programs must meet the general education requirements and provide for substantial additional work in the liberal, fine or performing arts. Such programs, if transfer-oriented, may need to contain additional requirements. The general education core is not directed toward specialized study or specific occupational or professional objectives.

(b) The Associate in Science (A.S.) degree—awarded to those who successfully complete programs which emphasize mathematics and/or the biological or physical sciences and which meet the general education requirements of this degree. In addition to meeting the general education requirements for an associate degree, substantial work must be done in mathematics, and/or the biological and physical sciences. Such programs are designed to serve both career and transfer objectives. Such programs, if transfer-oriented, may need to contain additional requirements

(c) The Associate in Applied Science (A.A.S.) degree—awarded to those who successfully complete programs which emphasize preparation in the applied arts and sciences for careers, typically at the technical or semi-professional level. Not less than 15 semester credit hours or 23 quarter hours in general education and not less than 30 semester credit hours or 45 quarter hours in the area of specialized preparation are required.

The University of North Carolina and the North Carolina Community College System have developed a Comprehensive Articulation Agreement to guide the transfer of students from associate programs to upper-division university programs. Substantial additional requirements must be met for students to qualify for transfer under the Articulation Agreement. For example, the Articulation Agreement requires 44 semester hours of general education for both the Associate in Arts and the Associate in Science. Many private and independent colleges in North Carolina have accepted the Articulation Agreement to govern transfer to their institutions. Licensed institutions must make students aware of the transfer requirements in North Carolina.
**F. Baccalaureate Degree**

Each program of instruction leading to a baccalaureate degree shall include a general education component at the collegiate level that is a substantial component of each undergraduate degree, ensures breadth of knowledge, and is based on a coherent rationale. A minimum of 30 semester hours or the equivalent is required for a general education course of study. The credit hours are to be drawn from, and include at least one course in each of the following areas: humanities/fine arts, social/behavioral sciences, and natural science/mathematics. The general education course work shall not focus on narrow skills, techniques, or procedures relative to a particular occupation or career. Institutions must present a written justification and rationale for course equivalency. Additionally, baccalaureate degree programs must include clearly defined requirements for majors in academic disciplines. Baccalaureate degree programs normally consist of courses carrying a minimum of 120 semester credit hours or 180 quarter hours or the equivalent in other measurement used by the institution. Normally full-time attendance for four academic years or the equivalent in part-time attendance, independent study, work study, or other similar programs are required, but institutions may award the baccalaureate degree to students who have completed the credit requirements at an accelerated pace or can otherwise demonstrate that they have met the measurable objectives of the program.

**G. Graduate Degree**

An institution’s post-baccalaureate professional degree programs, and its master’s, first professional, and doctoral degree programs are progressively more advanced in academic content than undergraduate programs. The institution shall ensure that its graduate instruction and resources foster independent learning, enabling the graduate to contribute to a profession or field of study. The majority of credits toward a graduate or a post-baccalaureate professional degree are earned through the institution awarding the degree. In the case of graduate and post-baccalaureate professional degree programs offered through joint, cooperative, or consortia arrangements, the student earns a majority of credits from the participating institutions. A graduate or post-baccalaureate degree normally represents the completion of a program beyond the baccalaureate level of one or more academic years of full-time course work or the equivalent in part-time attendance, independent study, work-study, or other similar programs. An institution may award a graduate degree to students who have completed the requirements of a graduate program at an accelerated pace or can otherwise demonstrate that they have met the measurable objectives of the program. The following graduate degrees as defined are acceptable:

(a) *The master’s degree*—awarded to those who successfully complete a program beyond the baccalaureate level in the arts and sciences, or professional fields normally requiring full-time study for not less than one nor more than two academic years. Master’s degrees usually require a minimum of 30 semester credit hours.

(b) *The intermediate degree*—(designated variously, e.g., specialist in professional education, engineer in engineering, and candidate or licentiate in liberal arts)—awarded to those who successfully complete programs at least one academic year beyond the master’s level but who do not reach the doctoral level. Normally, such programs qualify persons as highly knowledgeable and skilled in given fields rather than competent in carrying out independent research and scholarly work.

(c) *The doctoral degree*—awarded to those who successfully complete programs requiring three or more academic years of full-time graduate study beyond the baccalaureate level and demonstrate a capacity to do independent work. Such demonstration may take the form of completed research (doctor of philosophy), musical composition or performance (doctor of...
musical arts), clinical competence (doctor of medicine), or the knowledge and capacity to analyze legal problems (juris doctor). The latter two degree programs, along with dentistry, pharmacy, and veterinary medicine, constitute first professional degree programs.

**H. Residence**

The award of an associate or baccalaureate degree should normally entail at least 25 percent of the work being done through the institution awarding the degree. The method and procedures used by the institution in evaluating and granting credit for work done elsewhere must be described in writing. Methods and procedures recommended by the North Carolina Community College System/University of North Carolina’s Transfer Advisory Committee’s in its Comprehensive Articulation Agreement are available for undergraduate programs. The web site for the Agreement is: [http://www.northcarolina.edu/content.php/assessment/reports/student_info/caa.htm](http://www.northcarolina.edu/content.php/assessment/reports/student_info/caa.htm).

**I. Certification**

Upon satisfactory completion of a program of study, the student is awarded appropriate educational credentials (such as the associate or baccalaureate degree) by the institution certifying that the program of study has been satisfactorily completed by the student and that he or she has obtained in satisfactory measure the educational purpose of the program.

**J. Summer, Evening, and Distance Learning Instruction**

Summer, evening, and distance learning instruction (instructional activities in which the student is at a distance from the instructor or providing institution), when offered, should be considered part of the total program of an in-state or out-of-state institution and be judged by criteria as used for sessions and courses offered by the institution in the regular academic year. Each off-campus center or branch must provide in accordance with these rules and standards adequate classroom, laboratory, library, and other appropriate facilities as well as adequate administration, faculty, and support staff.

**K. Transferability**

The institution shall publish transfer policies and articulation agreements in recruitment materials and in the institution’s catalog. Policies and agreements must define criteria for transferring credit. The institution shall have a defined and published policy for evaluating, awarding and accepting credit for academic instruction, regardless of its mode of delivery. Students should be referred to the UNC/NCCCS Articulation Agreement for the standard practices for transfer in North Carolina.

**L. Degree-Related Activity Conducted by Out-of-State Institutions**

Any institution legally operating in another state that wishes to conduct post-secondary degree activity in North Carolina is to apply in the same manner for a license to conduct such activity and is to be judged by the same standards as an institution located in North Carolina.

**Standard 4**

*(Facilities and Library)*

The institution must have adequate space, equipment, instructional materials, and personnel available to it to provide education of good quality. [G.S. 116-15(f)(4)]
Guidelines

A. Facilities

The institution shall operate and maintain physical facilities, either on or off campus, that are adequate to serve the needs of the institution’s educational programs, support services, and mission-related activities. Physical facilities include buildings, classrooms, computers and access to the Internet, laboratories, equipment, furniture, grounds, instructional materials, and machinery. Facility sites should be free of traffic hazards and distracting noises. General tests of usefulness, cleanliness, and maintenance should be met.

(1) Compliance with Safety and Health Laws
The facilities shall comply with all pertinent ordinances and laws relative to the safety and health of persons on the campus. Also see Standard 9.

(2) Laboratories and Equipment
Laboratories and equipment must be adequate for supporting the particular program of instruction and enhancing student-learning outcomes.

(3) Supportive Services
Supportive services, faculty and staff offices, and other facilities must be adequate in size and number to accommodate faculty, staff, and students.

(4) Housing
Student housing owned, maintained, or approved by the institution must be appropriate, safe, and adequate. Also see Standard 13.

(5) Nonownership
If a physical facility is not owned by the institution, evidence through a lease or other means must be submitted that facilities are available for a sufficient duration to demonstrate the stability of the institution and that the institution is capable of completing any program it offers.

B. Library and Electronic Resources

An adequate library or access to a library and information resources is essential to supporting instruction and enhancing student-learning outcomes.

(1) Objectives and Policies
The library must have a mission statement and goals to serve as a framework for its activities. The mission and goals are to be compatible and consistent with the institution’s mission. The institution shall be able to demonstrate that the library and information resources (or access to library and information resources) fulfill the institution’s mission and provide adequate support to academic programs.

The library shall engage in a formal planning process (such as strategic planning) that involves a broad spectrum of the college community and includes the faculty and students. Planning is an iterative process that includes evaluation, updating, and refinement. Evaluation of library resources shall involve all categories of library users.

2 In revising the section on libraries, we consulted several individuals and used the “Standards for Libraries in Higher Education” (June 2004), developed by the Association of College & Research Libraries (ACRL), a division of the American Library Association (ALA), as a guide. ACRL/ALA has granted permission for the incorporation of portions of the “Standards for Libraries in Higher Education” in this context.
The institution must ensure that users have access to regular and timely instruction in the use of the library and other learning/resources.

The lines of authority, status, tenure, and major duties of the librarian should be clearly stated as well as the nature of faculty involvement in the determination of library policy and in acquisition procedures.

Contractual agreements with other libraries must define the following: (a) the extent to which the holdings of the other libraries support adequately the institution’s educational program and enrollment at the relevant degree level, (b) the degree to which students of the institution can use these libraries and the nature of the use, including procedures for student and faculty registration for use, (c) the arrangements with the other libraries for acquisition of materials needed for the institution’s educational program which the outside library may not normally acquire, (d) the degree of authority of the institution’s officials in making library policy to support the needs of the institution, (e) financial arrangements or fees for the use of other libraries, and (f) responsibilities of the college for replacement of materials lost by students of the college. The details of the contractual arrangements with other libraries must meet the criteria outlined in these standards.

(2) Staff
The library staff must be of a size and quality adequate to meet the objectives of the library and the academic programs it supports.

The library must be under the direction and supervision of a professionally trained librarian, who has a graduate library degree from a school of library science that is accredited by the American Library Association. The absolute minimum requirements for the chief librarian are 18 semester hours in library science, and a bachelor’s degree. The librarian should perform duties of a professional nature, involving organization of the entire library program, supervision or performance of acquisitions, cataloging, reference, circulation and use functions, and coordination of the library with the academic program of the college. The last involves working with faculty members in the selection and use of materials, and organizing and/or conducting a library orientation and instruction program for students and faculty.

Staff of the library should be sufficient to perform all the clerical functions of the library and must have skills and training appropriate for their duties.

(3) Administration
The library should be administered in a manner that permits and encourages the most effective use of available library resources. For the most effective coordination of the library with the instructional program, it is essential that the college librarian report either to the chief executive officer or the chief academic officer.

There should be a standing advisory committee of faculty members representative of the academic programs of the college to advise the librarian at least annually on acquisitions and ways of improving library services as well as to serve as the main channel of formal communications between the library and the user community. The library committee should also evaluate annually the adequacy of the collection and services.

The library must keep up-to-date and adequate records of circulation, holdings, inventory data, materials on order, current periodicals received, expenditures, and budgets. The library should
encourage the additional use of other library resources that may be available and seek out and help develop cooperative agreements with other libraries. Written contractual agreements should be negotiated with the libraries and these agreements should include the items specified under “Policies and Objectives” of these guidelines. The institution should assign responsibility for providing library/learning resources and services and for ensuring continued access to them at each site.

(4) **Distance Education**

The institution is responsible for funding and appropriately meeting the information needs of students enrolled in its distance learning courses and programs by supporting teaching, learning, and research. This support must provide ready and equivalent library service and learning resources to all its faculty and students, regardless of location. The institution must own the library/learning resources, provide access to electronic information available through existing technologies, and/or provide them through other libraries. If programs are to depend primarily on other libraries, the collections in those libraries should be adequate to support academic programs and courses at levels relevant to the degree objective.

(5) **The Library Collection**

The holdings of the library must be appropriate for the purpose, the course offerings, degree programs, and enrollment of the institution. College libraries should assure quality and appropriateness of the collection by the use of standard lists of books and periodicals for selection. The number of volumes in the collection, or access to resources, must be appropriate for the academic programs and the enrollment.

Procedures should be developed to involve the faculty in selecting materials for the collection. Selection tools such as *Choice, Current Reviews for Academic Libraries, Book Publishing Record, Library Journal*, and professional library journals should be available for selection of current books and periodicals. There should be a continuing evaluation of the quality of the collection by checking holdings against bibliographies, and basic lists.

(6) **Organization of Collection**

Materials should be classified and organized by nationally approved conventions and arranged on the shelves for efficient retrieval. A catalog or catalogs of holdings by author, title, and subject should be available for public use. In addition, requisite subordinate files such as serial checking records and shelf lists should be available.

(7) **Budget and Finance**

An annual library operating budget, which authorizes sufficient financial support, is required to provide, maintain, and insure adequate and suitable library holdings, facilities, and services. Experience suggests that the operating budget at an established and functioning library would be 3 percent of the institution’s annual total educational and general budget. However, libraries with identified deficiencies or determined to be marginally adequate should be provided an appropriately larger percentage of the institutional total educational and general budget. In either event, the operating budget required by these guidelines shall include financial support only for direct operating expenses of the library and should exclude any allowance for institutional overhead, any allocation or distribution of institutional indirect costs, any provision for depreciation, cost allocation, or cost recovery of library facilities, and capital outlays for the library.
**Service and Use**

The library should establish and maintain a range and quality of services that will promote the academic program of the college. In addition to providing basic reference and circulation services, orientation and instruction in the use of libraries should be provided for students and faculty. It would be desirable to have a written library guide and/or handbook for students and faculty members. When appropriate, teaching faculty should require the use of library materials in instructional programs, such as supplementary readings and research papers.

The library should be open to student access for a reasonable number of hours when classes are not scheduled, both during the normal study week and during weekends and vacation periods. Library materials should be circulated to students, faculty members, and other qualified users under equitable policies.

The quality of the collections available locally to patrons should be enhanced by an interlibrary loan service in accordance with the American Library Association (ALA) Interlibrary Loan Code and local, regional, or state interlibrary cooperative agreements.

**Library Quarters**

Space assigned for library usage should convey a pleasant and inviting atmosphere and give a feeling of spaciousness and quietness conducive to study. A central and single location is desirable. The library should have good lighting, adequate ventilation, and proper temperature and humidity control. Layout of the area should stress functionality while retaining as much flexibility as possible. The book collection should be arranged on open shelving readily accessible to patrons who, ideally, will be provided with seating immediately adjacent to the books.

Size or square footage requirements will be dependent upon the size of the student body, number of volumes in the collection, and the type of instructional program emphasized by the college.

(a) Seating should be provided for at least 10 percent of the largest number of students on campus at any time.

(b) Space allocated for book and periodical shelving should be sufficient for normal growth, as well as for the current collection. In addition, adequate space should be provided for staff, library services, and other instructional materials, which may require special facilities for safekeeping.

**Equipment**

Furniture, computers, copy machines, audiovisual, digital and general equipment should be operational and in an adequate state of repair.

**Standard 5**

*(Faculty and Other Personnel Qualifications)*

The education, experience, and other qualifications of directors, administrators, supervisors, and instructors must be such as may reasonably ensure that the students will receive, or will be reliably certified to have received, education of good quality consistent with the stated objectives of any course or program of study, equivalent experience, or achievement test offered by the institution. [G.S. 116-15(f)(5)]
Guidelines

A. Faculty

The most important component of an institution in seeking to achieve its purpose is the faculty. Maximum effort should be devoted to recruiting effective faculty and nurturing their professional growth. The institution must employ competent faculty members to accomplish the mission and goals of the institution and must give them the central role in curriculum development and delivery. When determining acceptable qualifications of its faculty, an institution must give primary consideration to the highest earned degree in the discipline in accord with the guidelines listed below. The institution shall also consider competence, effectiveness, and capacity, including, as appropriate, undergraduate and graduate degrees, related work experiences in the field, professional licensure and certifications, honors and awards, continuous documented excellence in teaching, or other demonstrated competencies and achievements that contribute to effective teaching and student learning outcomes. For all cases, the institution is responsible for justifying and documenting the qualifications of its entire faculty, regardless of method of delivery or location.

B. Educational Credentials

(1) Faculty Teaching in a Two-Year Institution
Faculty teaching in a two-year institution offering the associate degree must hold at least the master’s degree or the equivalent in the field of specialization in which they are teaching. Exceptions must be justified by special competence in their field of knowledge. A minimum of 18 graduate semester hours in the master’s degree must be in the discipline in which they are teaching, from a regionally accredited institution of higher education. Teaching disciplines are those considered appropriate for faculty teaching a subject area by discipline experts.

(2) Faculty Teaching in a Four-Year Institution
Faculty teaching in a four-year institution offering the baccalaureate degree must hold at least the master’s degree or equivalent in the field of specialization in which they are teaching. A majority of the faculty must have satisfactorily completed work beyond the master’s degree in an accredited graduate school, and at least 25 percent of the course hours in each major must be taught by faculty who hold the doctorate or other terminal degree in the field of specialization from a regionally accredited institution of higher education.

(3) Faculty Teaching General Education Courses
For faculty teaching general education courses at the undergraduate level: a doctoral or a master’s degree in the teaching discipline or a master’s degree with a concentration in the teaching discipline (a minimum of 18 graduate semester hours in the teaching discipline) is required.

(4) Faculty Teaching in Programs Granting Graduate Degrees
Faculty teaching in programs granting graduate degrees must hold the doctorate or other terminal degree in the teaching discipline or related field.

(5) Faculty Teaching in First Professional Degree Programs
Faculty teaching in first professional degree programs must meet recognized standards in their fields.

(6) Graduate Teaching Assistants
For baccalaureate instruction, graduate teaching assistants (applicable to graduate degree or professional degree granting institutions) must hold a masters in the teaching field or 18 graduate
semester hours in the teaching discipline. Graduate assistants must be directly supervised by a faculty member experienced in the teaching discipline with regular in-service training and planned and periodic evaluations.

(7) Size
The faculty must be sufficient in number, and the proportion of part-time members and the student-teacher ratio must be such as to assure the effectiveness of the educational program, including counseling and advising of students. The faculty must be representative of the principal areas of instruction offered by the institution and have a composition relevant to the number and nature of the courses taught. Further, the faculty should consist of full-time appointments sufficient to insure continuity and stability of the educational programs and to provide adequate educational association between students and faculty. In no instance should the faculty number fewer than four full-time members.

Whatever the size of the faculty, electronically delivered courses must provide for meaningful and continuing interaction between faculty and among students.

(8) Definition of Responsibilities
Faculty responsibilities must be defined in writing in terms of hours taught, course development and research required, number of students, level of instruction, research expected, administrative duties, student advising, committee assignments, counseling assignments, and other expectations.

(9) Faculty Development
The institution should provide evidence of ongoing professional development of faculty. Faculty individually should engage in continuing professional study or research appropriate to their responsibilities. Provision should be made for attendance at professional meetings and periodic study leaves to encourage continued competence, effectiveness, and productivity. Faculty teaching via an electronic system must be provided appropriate training, support services, equipment, software and communications for interaction with students, faculty, and other institutional personnel.

(10) Appointment
Faculty should be appointed by official action of the governing board of the institution upon recommendation by its chief executive officer. Notice of appointment should be in writing and should contain the conditions of employment and personnel policies with regard to academic freedom and economic security.

(11) Evaluation of Faculty
The institution must evaluate annually the effectiveness of each faculty member in accord with published criteria, regardless of contractual or tenured status. These data should be available and used for faculty development and appointment decisions.

(12) Academic Freedom
The institution should publish policies on academic freedom.

(13) Faculty Involvement in Decision Making
The institution should publish policies clearly defining the role of the faculty in decision making in the hiring of other faculty, curriculum development, evaluation of faculty, and the hiring and evaluation of administrative staff.
(14) Stability
The faculty conducting classes in upper-division courses should be stable. The institution must provide a roster evidencing such stability in its initial application and in each annual report. The institution should induce such stability with adequate salaries, fringe benefits, desirable working conditions, and tenure status as appropriate.

C. Administration
The chief executive and administrative officers should hold at least the master’s degree. The chief academic officer and academic officers (e.g., deans, department chairpersons) must also hold a minimum of a master’s degree. Exceptions should be justified by special competence or experience in their areas of responsibility and must be documented in personnel files. For baccalaureate or higher-degree granting institutions, the terminal degree in the teaching discipline will normally be expected for academic officers.

Standard 6 (Catalog)
The institution must provide students and other interested persons with a catalog or brochure containing information describing the substance, objectives, and duration of the study, equivalent experience, and achievement testing offered; a schedule of related tuition, fees, and all other necessary charges and expenses; cancellation and refund policies; and such other material facts concerning the institution and the program or course of study, equivalent experience, and achievement testing as are reasonably likely to affect the decision of the student to enroll therein, together with any other disclosures that may be specified by the board. Such information is provided to prospective students prior to enrollment. [G.S. 116-15(f)(6)]

The catalog shall also include a description of the faculty and their qualifications, a description of students’ rights, admission policies, transferability, articulation agreements, student code of conduct, and other relevant institutional policies. The catalog must clearly indicate the specific beginning and ending dates defining the time period covered by the catalog. The institution shall provide a statement in its catalog of the transferability of its courses and degrees to other academic institutions that are regionally accredited. The institution shall update its catalog at least biennially.

Guidelines
In addition to the information specified above, the catalog must contain statements with respect to the following:

(1) Mission of the institution.

(2) Ownership and control of the institution, directly and indirectly.

(3) Name, title, and office location of officer responsible for receiving students who wish to file complaints and to seek redress.

(4) Location and accessibility of Guaranty Bond (for prepaid tuition held) for review by anyone wishing to see it.

(5) Location, telephone number, electronic mail and Web address of the principal office of the corporation directly owning the institution and of the institution offering the degrees.
(6) Availability of health care services and degree of responsibility of the institution for providing such services.

(7) Cancellation and refund policy.

(8) In the case of courses delivered electronically, catalogs or brochures must provide students with clear and complete information on the nature of faculty/student interaction, prerequisite technology competencies and skills, technical equipment requirements, and availability of academic support services.

**Standard 7**

*(Program Completion Credentials)*

Upon satisfactory completion of study, equivalent experience, or achievement test, the student must be given appropriate educational credentials by the institution, indicating that the relevant study, equivalent experience, or achievement testing has been satisfactorily completed by the student. [G.S. 116-15(f)(7)]

**Guidelines**

The institution must employ sound and acceptable practices for determining the amount and level of credit awarded for courses, regardless of format or mode of delivery.

The institution must have a defined and published policy for evaluating, awarding and accepting credit for transfer, experiential learning, advanced placement, and equivalent experiences that is consistent with its mission and ensures that course work and learning outcomes are at the appropriate post-secondary level. The institution assumes responsibility for the academic quality of any course work or credit recorded on the institution’s transcript.

A post-secondary degree is a credential conferring on the recipient thereof the title of ‘Associate,’ ‘Bachelor,’ ‘Master,’ or ‘Doctor,’ or an equivalent title, signifying educational attainment based on (1) study, (2) a substitute for study in the form of equivalent experience or achievement testing, or (3) a combination of the foregoing; provided, that ‘post-secondary degree’ shall not include any honorary degree or other so-called ‘unearned’ degree and that the normal periods of study for the degree are met.

**Standard 8**

*(Student Records)*

The institution must maintain records that are adequate to reflect the application of relevant performance or grading standards to each enrolled student. [G.S. 116-15(f)(8)]

**Guidelines**

Consistent with federal and state law, the institution must protect the security, confidentiality, and integrity of its student records. The institution shall maintain student records for each student, whether or not the student completes the educational program.
A. Content of Records

Records should show attendance, progress, or grades of each enrolled student.

B. Purpose of Records

Adequate student records must be maintained by the institution to substantiate student attendance, academic progress, grades earned, and to provide evidence that satisfactory standards are enforced relative to attendance, progress, and performance.

C. Disposition of Records

Provision should be made for the disposition of permanent and other critical student records in the event that the institution discontinues operations. The records must be disposed of in accord with regulations of the Division of Archives and History of the State of North Carolina, Raleigh (http://archives.ncdcr.gov/).

Standard 8B
(Student Services)

The institution must provide adequate services for students in addition to formal instructional experiences of the classroom and laboratory. These services normally include admissions, orientation, counseling and guidance, academic advising, financial assistance, health care, job placement, student records, and extracurricular activities. Student services should support the institution’s mission, and they should be evaluated annually. Sufficient qualified personnel should be employed to ensure the quality and effectiveness of all services for students.

Guidelines

Consistent with its mission, the institution should provide student support programs, services, and activities that promote student learning and enhance the development of its students.

A. Admissions

The institution must have a clearly stated admissions policy. High school graduation or demonstrable equivalent should be required for freshman matriculation. A bachelor’s degree or demonstrable equivalent should be required for admission into graduate or professional degree programs. Admission is determined by the readiness and ability of a student to gain knowledge from the instructional offerings.

B. Counseling and Guidance

Appropriate counseling and guidance services should be available to students. An advisor should be assigned to assist each student in program planning, course selection, and other academic matters. Special care should be exercised to maintain and protect confidentiality of counseling records.

C. Health Care Services

Suitable health care services should be readily available in or near the institution. The character of these services and degree of institutional responsibility should be stated in the catalog and other appropriate literature.
D. Job Placement Assistance

If an institution represents to the public, in any manner, that an educational curriculum leads to employment, there must be annual written employer data, graduation rates, and employment rates, available upon request. Additionally, the institution should report job placement statistics yearly.

There should be a clear description of the job placement assistance that the institution provides in the enrollment application or materials. The quality of placement services at an institution must be consistent with its published statements.

E. Financial Aid

Normally, financial aid to students is administered through a single campus office. The four principal programs through which students may receive financial aid while in college are scholarships, grants, loans, and jobs. The financial aid officer may combine different types of assistance into a single aid “package” for a needy student. The administration and distribution of financial assistance must be performed according to written institutional policies and procedures that are consistent with basic principles of financial aid.

F. Records

A plan must be developed for disposition of permanent and other critical student records in the event that the institution discontinues operations. These records must be disposed of in accordance with regulations of the Division of Archives and History of the State of North Carolina, Raleigh.

Standard 9
(Compliance with Ordinances and Laws)

The institution must be maintained and operated in compliance with all pertinent ordinances and laws, including rules and regulations adopted pursuant thereto, relative to the safety and health of all persons upon the premises of the institution. [G.S. 116-15(f)(9)]

Standard 10
(Finance and Organization)

The institution must be financially sound and capable of fulfilling its commitments to students. [G.S. 116-15(f)(10)]

Guidelines

A. Finances

The institution must possess and maintain adequate financial resources to sustain its mission and purpose.
(1) Stability
Financial resources should be characterized by stability that indicates the institution is capable of maintaining operational continuity for an extended period of time. The minimum “extended period of time” is the duration of the most lengthy post-secondary degree program offered, e.g., associate degree program, two years; bachelor’s degree program, four years; master’s degree program, five years or more; doctor’s degree program, seven years or more.

(2) Adequacy
Adequacy of financial support is based, in part, on

(a) Average annual expenditures per student for educational programs;
(b) Average annual income per student from educational activities;
(c) The ratio of net profit, adjusted, to debt service costs (Normally, the formula components are annual net profit plus interest on debt plus expenses not requiring an outlay of funds, such as depreciation, divided by debt service costs, consisting primarily of payments on principal and interest); and
(d) Financial policies, procedures, and practices adopted or utilized by the institution.

(3) Plan for Financial Development
A coordinated, comprehensive, flexible financial plan (budget) for long-range management of the institution must be maintained.

(4) Financial Records and Audit Report
The institution’s recent financial history must demonstrate financial stability. The institution shall present documents consistent with generally accepted accounting standards reflecting its financial condition during the application process and yearly, thereafter, in the reporting process.

The institution must maintain adequate and sufficient financial records, and its financial statements must be audited annually by an independent certified public accountant (CPA) according to generally accepted auditing standards. The independent certified public accountant should render an unqualified opinion as to the fairness of presentation of financial statements and as to their conformity with generally accepted accounting principles.

An institution shall submit the following financial information with its initial application:

- Reviewed financial statements for the extension location.
- A copy of the most recent audit report for the institution.
- A detailed description of any material changes in any of the information contained in the audit report or a statement indicating that there are no material changes.
- A detailed disclosure of legal and binding relationships with any parent or subsidiary corporation or institution.

(5) Insurance
Adequate casualty and liability insurance must be maintained to protect the institution’s financial interests.

(6) Bonding
Tuition guaranty bond, or equivalent, of not less than $10,000 and at least equal to or higher than the maximum amount of prepaid tuition held (i.e., unearned tuition held) existing at any time during the most recent fiscal year must be maintained.
(a) The institution must provide a statement by an independent certified public accountant specifying the existing principal amount of tuition guaranty bond and that the principal amount is not less than $10,000 and is at least equal to or higher than the maximum amount of prepaid tuition held (i.e., unearned tuition held) existing at any time during the most recent fiscal year.

Such statement should be expressed as follows:

The guaranty tuition bond in the amount of (amount) maintained by (name) College as of the date of this statement is not less than $10,000 and is at least equal to or higher than the maximum amount of prepaid tuition held (i.e., unearned tuition held) existing at any time during the fiscal year ended ____________.

(b) The amount of “prepaid tuition held” by an institution should be determined as follows:

(i) The amount of prepaid tuition held is the excess of cumulative collections of tuition and related required fees over the cumulative amount of earned tuition and related required fees.

(ii) Cumulative collections are the amount of cash received by an institution for a student’s account as payment for the applicable tuition and related required fees.

(iii) Tuition and related required fees are recognized as earned revenue on a daily pro rata basis during a contract period for each separate contract.

(iv) A contract period, i.e., the period of providing instructional services, extends from the first day of classes for an academic term through termination of the academic term’s final examinations.

(v) A separate contract for instructional services exists for each academic term for each individual student. An institution is contractually committed to individual students rather than all students collectively. Therefore, the bond must be sufficient to reimburse each individual student who has remitted prepaid tuition to an institution. In those instances where negative amounts of “prepaid tuition held” exist, students are indebted to the institution for instructional services provided but which are unpaid.

(vi) The amount of “prepaid tuition held” must be determined for each individual student and in the aggregate for the institution at least once each month (on a recurring date) during the most recently concluded fiscal year.

(vii) Negative amounts of “prepaid tuition held” for individual students on any measurement date must not be offset against positive amounts of prepaid tuition held when determining the aggregated amount of prepaid tuition held.

(viii) The principal amount of the guaranty bond must be the greater of $10,000 or the highest monthly amount of aggregated “prepaid tuition held” for all students with positive balances during the fiscal year measurement period.

(ix) The amount of “prepaid tuition held” is verifiable by an alternative calculation; i.e., it is equivalent to the excess of unearned tuition and related required fees (determined on an individual student basis) over the student’s unpaid tuition and related required fees. Negative amounts of “excess” so derived must be excluded from the aggregating calculation. The summation of individual amounts so derived will equal “prepaid tuition held” determined by the method described in steps numbered i through viii above.
B. Organization

The institution must be organized to provide efficient and effective administrative, program, and resource support for the attainment of its mission and purpose. The institution should demonstrate that there is an ongoing planning and evaluation process that guides its decision-making and actions.

The institution shall demonstrate that it engages in continuous planning, evaluation, and improvement. The institution must be able to demonstrate that it accomplishes its mission by presenting student data, faculty data, employment data, and other evaluative data consistent with an appropriate standard.

(1) Statement of Mission

The broad purpose of degree-granting institutions of higher education is threefold: a) the preservation and transmission of knowledge through teaching at a more advanced level than secondary education, (b) the discovery of knowledge through research, and c) the application of knowledge through public service. Diverse and varied autonomous institutions, each with its own special mission, offer a multiplicity of programs, which collectively constitute efforts in the United States to achieve the broad purpose of higher education.

Each institution pronounces its role in the higher educational spectrum through a mission statement. This statement, comprising the philosophy and objectives of the institution, should include definitions of the educational climate to be maintained, the character of education that students are expected to possess upon graduation, the occupational and other outcomes expected from available programs, and characteristics of attained individual growth. The statement should be operationally effective and should be periodically reviewed for possible improvement and restatement. An interval of five years is suggested as a maximum period between reviews.

The statement should describe both the concept and practice of the institution. The institution must be prepared to present evidence that the various elements of its operation (i.e., faculty work, educational program, student life, finances, physical facilities, organization, and administration) are designed to support the stated mission. The institution’s integrity is to be judged according to its stated mission, its efforts to achieve this mission, and the degree of attainment. The statement of mission must be published in the institution’s catalog.

(2) Incorporation

The institution must be incorporated.

(3) Governance

The institution should operate under control of a governing board of directors. The board should be responsible for:

(a) Achievement of all legal requirements pertaining to incorporation and operation.
(b) Formulation of institutional policy, including policies concerning related and affiliated corporate entities and all auxiliary service(s).
(c) Selection and evaluation of a chief executive officer.
(d) Appointment of subordinate staff and professional personnel.
(e) Fiscal stability of the institution.
(f) The institutional mission.
(g) Development and maintenance of bylaws consistent with the institution’s mission and specifying the number, manner of appointment, and terms of officers and members of the board; frequency of minimum meetings per annum; format of official minutes of board meetings; and all matters related to duties, responsibilities, and procedures of the governing board and its members.

If the governing board delegates any of its policymaking or other powers, duties, or responsibilities to other parties, such delegations must be approved by a majority of the membership of the board, be in writing, be recorded in the minutes, and not compromise the institution’s present or future financial stability and/or capability of fulfilling commitments to students.

(4) Management
The institution shall have a governing board with specific policy making authority over the institution. There must be a clear and appropriate distinction, in writing and practice, between the policy-making functions of the governing board and the responsibility of the administration and faculty to administer and implement policy. The institution shall have a chief executive officer whose primary responsibility is to the institution and who is not the presiding officer of the board.

The governing board shall have a policy and a process to monitor conflicts of interest.

Business and financial management should be centralized and administered in a qualified and bonded business office responsible to the chief executive officer charged with supervision of the budget.

(5) Administration
Administrative responsibilities and concomitant authority should be clearly stated in writing.

(a) Organizational charts showing lines of authority and relationships among component units, positions, and personnel should be communicated and continuously updated.

(b) The role of each group comprising an institution (i.e., governing board, administrators, faculty, students) and the nature and extent of the involvement of each group in resolution of issues and determination of the policies should be available in writing for distribution to all constituent groups.

Standard 11
(Business Practices)

The institution, through itself or those with whom it may contract, must not engage in promotion, sales, collection, credit, or other practices of any type which are false, deceptive, misleading, or unfair. [G.S. 116-15(f)(11)]

Guidelines

A. Form of Policies

Policies pertaining to promotion, sales, collection, credit, and other practices of any type must be accurate, written, and readily available for review.
B. Availability of Promotional Materials

Promotional materials should be readily available for review.

**Standard 12**  
(Professional Conduct)

The chief executive officer, trustees, directors, owners, administrators, supervisors, staff, instructors, and employees of the institution must not have a record of unprofessional conduct or incompetence that would reasonably call into question the overall quality of the institution. [G.S.116-15(f)(12)]

**Guidelines**

Credentials; accurate records of academic, administrative, and other employment; and personal history resumes must be readily available for review.

**Standard 13**  
(Student Housing)

Any student housing owned and maintained or approved by the institution, if any, must be appropriate, safe, and adequate. [G.S. 116-15(f)(13)]

**Guidelines**

All North Carolina laws shall be met with reference to the safety and health of occupants and with reference to other applicable matters.

**Standard 14**  
(Cancellation and Refund Policy)

The institution must have a fair and equitable cancellation and refund policy. [G.S. 116-15(f)(14)]

**Guidelines**

The institution must have and maintain a fair and equitable cancellation and refund policy which applies equally to all students and that is published and disseminated to the public. Such policy must appear in the catalog of the institution and other appropriate publications.

**Standard 15**  
(Institutional Agent)

No person or agency with whom the institution contracts may have a record of unprofessional conduct, or incompetence that would reasonably call into question the overall quality of the institution. [G.S. 116-15(f)(15)]

**Guidelines**

Appropriate information should be readily available for review concerning any person or agency with whom the institution contracts for academic or support services.
V. Regular License

To undertake post-secondary degree activity in North Carolina, an institution, through itself or through an agent, must be licensed by the Board of Governors of the University of North Carolina. [G.S. 116-15(b)]

To be issued a regular license, the institution shall satisfy the Board that standards are met as required by the General Statues of North Carolina [G.S. 116-15(f)], and comply with rules, regulations, and procedures established by the Board to effect provisions of the General Statutes [G.S. 116-15(i)].

VI. Initial License

For a new degree program proposed for licensure, the Board of Governors may in some circumstances approve an initial license that will allow institutions to offer the degree program in North Carolina but whose continuing validity must be reaffirmed based on a visit by a team of examiners and action by the Board of Governors.

Normally this visit will take place within a year of the program’s starting, but no later than eighteen months from the date of initiation. An initial license is normally valid for one year but in no case can it be valid for more than eighteen months.

VII. Interim Permit

An institution which meets standards for regular licensure except for having conducted post-secondary degree activity for at least two years immediately prior to submitting an application for licensure may be granted an interim permit to conduct post-secondary degree activity if the institution can demonstrate a quality of stability, experience, reputation, and performance which two years of operation would normally denote. Before the end of the period of the interim permit, the institution will be re-evaluated to determine if it qualifies for a regular license. The procedure for seeking an interim permit is the same as that for seeking regular licensure.

VIII. Procedures for Seeking Licensure

A. Preliminary Conference

The chief executive officer of an institution seeking licensure contacts the University of North Carolina General Administration and arranges for a preliminary conference to discuss the Standards and procedures for applying for licensure. The mandatory, preliminary conference will take place in North Carolina at The University of North Carolina.

B. Letter of Intent

If, following the preliminary conference, the chief executive officer of the institution concludes that the institution will seek licensure in the State of North Carolina, the chief executive officer writes a letter to the University of North Carolina General Administration stating the intent of the institution to apply for licensure. This letter must describe the mission of the institution, the proposed degree programs for approval, and projected enrollment.
C. Application for Licensure

Following receipt of the letter of intent, the University of North Carolina General Administration requires that the institution submit a formal application that demonstrates it is in compliance (or will be in compliance once it hires faculty and secures appropriate facilities) with each licensure standard.

The application shall be accompanied by appropriate documentation that the institution meets and can maintain standards for licensure for an extended period of time. Documentation for each standard should be included in an indexed notebook. Additionally, the application shall contain a description of the policies and procedures used by the institution to monitor and assure compliance with licensure rules and procedures and continuously to evaluate and improve the quality of its programs and student services.

The application should include a copy of the institution’s catalog, including addenda reflecting newly approved educational services, in published or proposed-to-be-published form. Website and electronic address(es) should also be included in the catalog.

Depending on the institution’s mission, and the proposed degrees, review of the licensure application may take from six to twelve months. If an institution’s application is adequate, a site visit by a Team of Examiners will be scheduled. The visit and the Team of Examiners report and recommendations may take another three to four months.

D. Examination Visit

If the application and supporting documentations indicate that the institution is ready for an examination visit, the University of North Carolina General Administration arranges with the chief executive officer of the institution for a visit by a Team of Examiners to the campus and, if needed, other degree activity sites.

The purpose of the visit is to confirm documentation submitted by the institution evidencing compliance with standards of good quality education and to confirm whether the institution meets the other requirements established by the Board of Governors.

The Team of Examiners is composed of at least one officer of the University of North Carolina General Administration, faculty members representative of public and private sectors with the appropriate levels and fields of education, and other persons deemed necessary for a sound examination. All are appointed by the President of the University of North Carolina, or his or her designee, and they are selected based on their expertise in specific fields related to the licensure proposal.

One member of the examining committee is appointed chair, with responsibility for leading the examination and preparing the team’s report and recommendations.

Costs connected with the examination visit and subsequent visits, as may be necessary, such as travel, meals, lodging, and honoraria, are paid by the institution seeking licensure.

E. Examiners’ Report and Recommendations

Following the examination visit, the Team of Examiners prepares a report of its visit and a statement of recommendations concerning the institution’s application for licensure.
The Team of Examiners submits the report and statement of recommendations to the President of the University of North Carolina or the President’s designee within thirty days, or as soon as possible after completion of the examination.

All recommendations are advisory to the University of North Carolina General Administration. The statement of recommendations accompanying the Team of Examiners’ report should contain one of the following as concluding advice: (1) that the institution be issued a regular license, (2) that the institution be issued a license subject to completion of specified conditions, (3) that the institution be issued an initial license, or (4) that the institution be denied a license.

**F. Institutional Hearing**

After the Team of Examiners’ report and recommendations have been transmitted to the University of North Carolina General Administration, the chief executive officer of the institution may be invited to General Administration to discuss further the report and recommendations.

**G. Staff Review and Proposal**

The staff of General Administration reviews the Team of Examiners’ report and recommendations and any additional information that may result from an institutional hearing and submits a staff report to the President.

**H. Action of Board of Governors**

Following submission of the Team of Examiners’ report and recommendations along with a staff report, the President of the University of North Carolina submits a recommendation for action on the application of the institution for licensure to the Board of Governors. Following consideration, the Board of Governors acts on the application.

**I. Certificate of Licensure**

If the Board of Governors approves the application of an institution for licensure, the staff narrative of the proposal in the Board Book for the meeting of the Board of Governors will be extracted, signed by the Secretary of the University and is forwarded to the chief executive officer of the institution. The extract officially certifies that the institution is licensed to conduct post-secondary degree activity as specified.

**J. Restriction**

Licensure authorizes an institution to conduct post-secondary degree activity, only as specified by the Board of Governors.

**K. Review of Licensure**

Any institution that acquires licensure shall be subject at any time to review by the Board of Governors to determine whether the institution continues to meet standards for licensure.
An institution, which seeks to conduct post-secondary activity not previously licensed, shall also be subject to review. Review may necessitate use of a Team of Examiners. Cost of reviews is borne by the institution.

(1) Review of License
Review of licensure shall always occur if:

(a) Two years have elapsed since the institution was licensed by the Board of Governors, or
(b) The institution is legally reconstituted, or
(c) Ownership of a preponderance of all the assets of the institution changes pursuant to a single transaction or agreement or a recognizable sequence of transactions or agreements, or
(d) The institution seeks to grant additional degrees or add academic credit activity, regardless of the mode of delivery (i.e., distance education), or
(e) The institution opens another campus in another city or locality in North Carolina.

Review of licensure may occur if:

(a) The institution changes facilities within the same North Carolina city/town, or
(b) General Administration receives substantial complaints regarding compliance with the standards, or
(c) The institution adds concentrations or majors in a degree program that has been approved by the Board of Governors.

(2) Continuance of License
A regular license issued to an institution prior to the effective date of these revised rules and standards shall continue in effect following the effective date of these revised rules and standards. Institutions licensed at the time the Board of Governors approves revisions in the rules and standards will have two years to meet requirements in the revised rules and standards. Any applicant for licensure after the approval of the revised standards will be required to meet the revised rules and standards to qualify for licensure.

L. Annual Reporting

Each institution licensed by the Board of Governors shall complete an Annual Report and submit it to the University of North Carolina General Administration along with a copy of its financial statements audited by an independent certified public accountant, a statement by an independent certified public accountant that the indemnificatory value of the tuition penal bond maintained by the institution is in excess of the maximum amount of prepaid tuition held by the institution at anytime during its fiscal year, and other information as specified by General Administration.

An institution shall notify General Administration, in writing, if it plans to change the location of its main campus or satellite campus in North Carolina. The written notification shall be submitted at least 60 days prior to the proposed date of the change of location, unless the change is necessitated by an emergency. The institution will be contacted within 30 days of receipt of the notification, if further information is needed. General Administration must receive written notification of the intention of the institution to add concentrations or majors. Proposals for new concentrations and majors will be reviewed by General Administration to determine if any further action is needed.
IX. Procedures for Seeking Licensure for New Degree Activity

An institution holding a regular license issued by the Board of Governors, which seeks to conduct post-secondary degree activity not previously licensed shall complete a new degree application, similar to its original application and provide documentation that the new activity complies with the rules and standards for licensure as specified herein. The documentation should include information, which evidences compliance with the standards for licensure. The Board of Governors shall conduct such inquiry and examination, as it deems appropriate, including a review of the entire institution, to insure that the proposed degree activity meets those standards and that they can be maintained.

Denial and Revocation of Licensure

Any institution seeking licensure under these rules and standards that fails to meet them shall be denied a license to conduct post-secondary degree activity in North Carolina. Any institution holding a license to conduct post-secondary degree activity in North Carolina that is found by the Board of Governors not to satisfy these licensure requirements shall have its license to conduct post-secondary degree activity revoked by the Board, provided that the Board of Governors may continue in force the license of an institution deemed by the Board to be making substantial and expeditious progress toward remedying its licensure deficiencies. The institution shall be notified in writing of any staff recommendations that might result in revocation, with the grounds set forth for the action contemplated. The institution may request, in writing, within ten days of receipt of the notification, an interview to respond to the recommendation of noncompliance. In the event that the Board of Governors revokes the license, the institution shall be notified in writing within ten days.

X. Exemptions

A. Institutions Continuously Conducting Post-Secondary Degree Activity in North Carolina Since July 1, 1972

Any institution that has been continuously conducting post-secondary degree activity in this State under the same publicly registered name or series of publicly registered names since July 1, 1972 shall be exempt from the provisions for licensure upon presentation to the Board of Governors of information acceptable to the Board to substantiate such post-secondary degree activity and public registration of the institution’s names. Any institution that, pursuant to a predecessor statute, had presented to the Board proof of activity and registration such that the Board granted exemption from licensure, shall continue to enjoy such exemption without further action by the Board. [G.S. 116-15(c)]

B. Programs Relative to Religious Education

No institution shall be subject to licensure under this section with respect to post-secondary degree activity based upon a program of study, equivalent experience, or achievement testing, the institutionally planned objective of which is the attainment of a degree in theology, divinity, or religious education or in any other program of study, equivalent experience, or achievement testing that is designed by the institution primarily for career preparation in a religious vocation. This exemption shall be extended to any institution with respect to each program of study, equivalent experience, and achievement test that the institution demonstrates to the satisfaction of the Board should be exempt from licensure requirements. [G.S. 116-15(d)] Institutions seeking a religious exemption shall complete the application for religious exemption and follow directions contained therein.
C. Institutions Conducting Post-Secondary Degree Activity within the Military

To the extent that an institution undertakes post-secondary degree activity on the premises of military posts or reservations located in this State for military personnel stationed on active duty there, or their dependents, or employees of the military, the institution shall be exempt from licensure requirements. [G.S. 116-15(e)] If the institution offers or conducts post-secondary degree activity for other persons, the institution shall be subject to licensure. Institutions seeking a military exemption shall send written correspondence to General Administration identifying the military base and the degrees that will be offered. Institutions shall also present annual reports to General Administration describing degree activity and enrollments.

D. Distance Education Conducted Pursuant to a State Authorization Reciprocity Agreement

Any institution conducting post-secondary degree activity in North Carolina pursuant to a State Authorization Reciprocity Agreement to which the State of North Carolina is a party shall be exempt from licensure requirements.

XI. Enforcement

The Board of Governors shall call to the attention of the Attorney General, for such action as the Attorney General may deem appropriate, any institution failing to comply with these requirements for licensure.

XII. Licensure Fees

All institutions applying for or receiving licensure to conduct educational activities in North Carolina must pay licensing fees and annual fees based on the schedule in Appendix B.
Appendix A. North Carolina General Statutes Section 116-15, Licensing of Certain Nonpublic Post-Secondary Educational Institutions to Conduct Post-Secondary Degree Activity in North Carolina

From the General Statutes of North Carolina

§ 116-15. Licensing of certain nonpublic post-secondary educational institutions.
(a1) The General Assembly of North Carolina in recognition of the importance of higher education and of the particular significance attached to the personal credentials accessible through higher education and in consonance with statutory law of this State making unlawful any “unfair or deceptive acts or practices in the conduct of any trade or commerce,” hereby declares it the policy of this State that all institutions conducting post-secondary degree activity in this State that are not subject to Chapter 115 or 115D of the General Statutes, nor some other section of Chapter 116 of the General Statutes shall be subject to licensure under this section except as the institution or a particular activity of the institution may be exempt from licensure by one or another provision of this section.

(a2) Definitions. As used in this section the following terms are defined as set forth in this subsection:

(1) “Post-secondary degree.” A credential conferring on the recipient thereof the title of “Associate,” “Bachelor,” “Master,” or “Doctor,” or an equivalent title, signifying educational attainment based on (i) study, (ii) a substitute for study in the form of equivalent experience or achievement testing, or (iii) a combination of the foregoing; provided, that “post-secondary degree” shall not include any honorary degree or other so-called “unearned” degree.

(2) “Institution.” Any sole proprietorship, group, partnership, venture, society, company, corporation, school, college, or university that engages in, purports to engage in, or intends to engage in any type of post-secondary degree activity.

(3) “Post-secondary degree activity.” Any of the following is “post-secondary degree activity”:
   a. Awarding a post-secondary degree.
   b. Conducting or offering study, experience, or testing for an individual or certifying prior successful completion by an individual of study, experience, or testing, under the representation that the individual successfully completing the study, experience, or testing will be awarded therefore, at least in part, a post-secondary degree.

(4) “Publicly registered name.” The name of any sole proprietorship, group, partnership venture, society, company, corporation, school, college, or institution that appears as the subject of any Articles of Incorporation, Articles of Amendment, or Certificate of Authority to Transact Business or to Conduct Affairs, properly filed with the Secretary of State of North Carolina and currently in force.

(5) “Board.” The Board of Governors of The University of North Carolina.

(b) Required License. No institution subject to this section shall undertake post-secondary degree activity in this State, whether through itself or through an agent, unless the institution is licensed as provided in this section to conduct post-secondary degree activity or is exempt from licensure under this section as hereinafter provided.

(c) Exemption from Licensure. Any institution that has been continuously conducting post-secondary degree activity in this State under the same publicly registered name or series of publicly registered names since July 1, 1972, shall be exempt from the provisions for licensure under this section upon presentation to the Board of information acceptable to the Board to
substantiate such post-secondary degree activity and public registration of the institution’s names. Any institution that, pursuant to a predecessor statute to this subsection, had presented to the Board proof of activity and registration such that the Board granted exemption from licensure, shall continue to enjoy such exemption without further action by the Board.

(d) Exemption of Institutions Relative to Religious Education. Notwithstanding any other provision of this section, no institution shall be subject to licensure under this section with respect to post-secondary degree activity based upon a program of study, equivalent experience, or achievement testing the institutionally planned objective of which is the attainment of a degree in theology, divinity, or religious education or in any other program of study, equivalent experience, or achievement testing that is designed by the institution primarily for career preparation in a religious vocation. This exemption shall be extended to any institution with respect to each program of study, equivalent experience, and achievement test that the institution demonstrates to the satisfaction of the Board should be exempt under this subsection.

(e) Post-Secondary Degree Activity within the Military. To the extent that an institution undertakes post-secondary degree activity on the premises of military posts or reservations located in this State for military personnel stationed on active duty there, or their dependents, the institution shall be exempt from the licensure requirements of this section.

(f) Standards for Licensure. To receive a license to conduct post-secondary degree activity in this State, an institution shall satisfy the Board that the institution has met the following standards:

1. That the institution is state-chartered. If chartered by a state or sovereignty other than North Carolina, the institution shall also obtain a Certificate of Authority to Transact Business or to Conduct Affairs in North Carolina issued by the Secretary of State of North Carolina;

2. That the institution has been conducting post-secondary degree activity in a state or sovereignty other than North Carolina during consecutive, regular-term, academic semesters, exclusive of summer sessions, for at least the two years immediately prior to submitting an application for licensure under this section, or has been conducting with enrolled students, for a like period in this State or some other state or sovereignty, post-secondary educational activity not related to a post-secondary degree; provided, that an institution may be temporarily relieved of this standard under the conditions set forth in subsection (i), below;

3. That the substance of each course or program of study, equivalent experience, or achievement test is such as may reasonably and adequately achieve the stated objective for which the study, experience, or test is offered or to be certified as successfully completed;

4. That the institution has adequate space, equipment, instructional materials, and personnel available to it to provide education of good quality;

5. That the education, experience, and other qualifications of directors, administrators, supervisors, and instructors are such as may reasonably insure that the students will receive, or will be reliably certified to have received, education consistent with the stated objectives of any course or program of study, equivalent experience, or achievement test offered by the institution;

6. That the institution provides students and other interested persons with a catalog or brochure containing information describing the substance, objectives, and duration of the study, equivalent experience, and achievement testing offered, a schedule of related tuition, fees, and all other necessary charges and expenses, cancellation and refund policies, and such other material facts concerning the institution and the program or course of study, equivalent experience, and achievement testing as are reasonably likely to affect the decision of the student to enroll therein, together with any other disclosures that may be specified by the Board; and that such information is provided to prospective students prior to enrollment;
(7) That upon satisfactory completion of study, equivalent experience, or achievement test, the student is given appropriate educational credentials by the institution, indicating that the relevant study, equivalent experience, or achievement testing has been satisfactorily completed by the students;

(8) That records are maintained by the institution adequate to reflect the application of relevant performance or grading standards to each enrolled student;

(9) That the institution is maintained and operated in compliance with all pertinent ordinances and laws, including rules and regulations adopted pursuant thereto, relative to the safety and health of all persons upon the premises of the institution;

(10) That the institution is financially sound and capable of fulfilling its commitments to students and that the institution has provided a bond as provided in subsection (f1) of this section;

(11) That the institution, through itself or those with whom it may contract, does not engage in promotion, sales, collection, credit, or other practices of any type which are false, deceptive, misleading, or unfair;

(12) That the chief executive officer, trustees, directors, owners, administrators, supervisors, staff, instructors, and employees of the institution have no record of unprofessional conduct or incompetence that would reasonably call into question the overall quality of the institution;

(13) That the student housing owned, maintained, or approved by the institution, if any, is appropriate, safe, and adequate;

(14) That the institution has a fair and equitable cancellation and refund policy; and

(15) That no person or agency with whom the institution contracts has a record of unprofessional conduct or incompetence that would reasonably call into question the overall quality of the institution.

(f1)

(1) A guaranty bond is required for each institution that is licensed. The Board may revoke the license of an institution that fails to maintain a bond pursuant to this subsection. If the institution has provided a bond pursuant to G.S. 115D-95, the Board may waive the bond requirement under this subsection. The Board may not waive the bond requirement under this subsection if the applicant has provided an alternative to a guaranty bond under G.S. 115D-95©.

(2) When application is made for a license or license renewal, the applicant shall file guaranty bond with the clerk of the superior court of the county in which the institution will be located. The bond shall be in favor of the students. The bond shall be executed by the applicant as principal and by a bonding company authorized to do business in this State. The bond shall be conditioned to provide indemnification to any student, or his parent or guardian, who has suffered a loss of tuition or any fees by reason of the failure of the institution to offer or complete student instruction, academic services, or other goods and services related to course enrollment for any reason, including the suspension, revocation, or non-renewal of an institution’s license, bankruptcy, foreclosure, or the institution ceasing to operate. The bond shall be in an amount determined by the Board to be adequate to provide indemnification to any student, or his parent or guardian, under the terms of the bond. The bond amount for an institution shall be at least equal to the maximum amount of prepaid tuition held at any time during the last fiscal year by the institution. The bond amount shall also be at least ten thousand dollars ($10,000). Each application for a license shall include a letter signed by an authorized representative of the institution showing in detail the calculations made and the
method of computing the amount of the bond, pursuant to this subdivision and the rules of the Board. If the Board finds that the calculations made and the method of computing the amount of the bond are inaccurate or that the amount of the bond is otherwise inadequate to provide indemnification under the terms of the bond, the Board may require the applicant to provide an additional bond. The bond shall remain in force and effect until cancelled by the guarantor. The guarantor may cancel the bond upon 30 days notice to the Board. Cancellation of the bond shall not affect any liability incurred or accrued prior to the termination of the notice period.

(g) Review of Licensure. Any institution that acquires licensure under this section shall be subject to review by the Board to determine that the institution continues to meet the standard for licensure of subsection (f), above. Review of such licensure by the Board shall always occur if the institution is legally reconstituted, or if ownership of a preponderance of all the assets of the institution changes pursuant to a single transaction or agreement or a recognizable sequence of transactions or agreements, or if two years has elapsed since licensure of the institution was granted by the Board. Notwithstanding the foregoing paragraph, if an institution has continued to be licensed under this section and continuously conducted post-secondary degree activity in this State under the same publicly registered name or series of publicly registered names since July 1, 1979, or for six consecutive years, whichever is the shorter period, and is accredited by an accrediting commission recognized by the Council on Post-Secondary Accreditation, such institution shall be subject to licensure review by the Board every six years to determine that the institution continues to meet the standard for licensure of subsection (f), above. However, should such an institution cease to maintain the specified accreditation, become legally reconstituted, have ownership of a preponderance of all its assets transferred pursuant to a single transaction or agreement or a recognizable sequence of transactions or agreements to a person or organization not licensed under this section, or fail to meet the standard for licensure of subsection (f), above, then the institution shall be subject to licensure review by the Board every two years until a license to conduct post-secondary degree activity and the requisite accreditation have been restored for six consecutive years.

(h) Denial and Revocation of Licensure. Any institution seeking licensure under the provisions of this section that fails to meet the licensure requirements of this section shall be denied a license to conduct post-secondary degree activity in this State. Any institution holding a license to conduct post-secondary degree activity in this State that is found by the Board of Governors not to satisfy the licensure requirements of this section shall have its license to conduct post-secondary degree activity in this State revoked by the Board; provided, that the Board of Governors may continue in force the license of an institution deemed by the Board to be making substantial and expeditious progress toward remedying its licensure deficiencies.

(i) Regulatory Authority in the Board. The Board shall have authority to establish such rules, regulations, and procedures as it may deem necessary or appropriate to effect the provisions of this section. Such rules, regulations, and procedures may include provision for the granting of an interim permit to conduct post-secondary degree activity in this State to an institution seeking licensure but lacking the two-year period of activity prescribed by subsection (f)(2), above.

(j) Enforcement Authority in the Attorney General. The Board shall call to the attention of the Attorney General, for such action as he may deem appropriate, any institution failing to comply with the requirements of this section.
(k) Severability. The provisions of this section are severable, and, if any provision of this section is declared unconstitutional or invalid by the courts, such declaration shall not affect the validity of the section as a whole or any provision other than the provision so declared to be unconstitutional or invalid. (1971, c. 1244, s. 1; 1973, c. 1331, s. 3; 1975, c. 268; 1977, c. 563, ss. 1-4; 1979, c. 896, s. 13; 1979, 2nd Sess., c. 1130, s. 1; 1983 (Reg. Sess., 1984), c. 1006; 1989 (Reg. Sess., 1990), c. 824, s. 2; 1997-456, s. 27.)
North Carolina State Authorization
Application for Licensure Fee Structure
(Revised October 2006)

Initial Fee: $5,000

The Initial Fee includes up to 4 degrees at the associate or bachelor’s level, two degrees at the master’s level, or one degree at the doctoral or first professional level. All programs must be reviewed at the time of the initial application submission in order to be considered. Checks should be made payable to: The University of North Carolina – General Administration.

In addition to the aforementioned fees, the institution seeking licensure shall be responsible for the honoraria and all travel expenses for the visiting team of examiners and representatives of General Administration.
Appendix C. Regulation 400.4.1 [R] Adopted 1/21/05

Regulations governing review of licensure for nonpublic, post-secondary institutions proposing to open additional campuses or sites in North Carolina to offer degree programs that have been previously licensed by the Board of Governors.

1. An institution proposing to open an additional campus or site in North Carolina to offer degree programs that have been previously licensed by the Board of Governors should send a letter of intent to General Administration indicating the degree programs it proposes to offer and the city and proposed location for offering them.

2. The institution shall provide an application for the proposed campus or site documenting that the institution is in compliance with, or intends to be in compliance with, the Rules and Standards at the proposed new campus or site. This application should be presented at least six months prior to the date the institution proposes to open a campus or site in a new city or locality.

3. General Administration will review the application for the proposed campus or site.

4. If appropriate, General Administration will respond in writing that the institution may proceed with its plans to open the new campus or site to offer the proposed postsecondary degree programs that have been previously approved by the Board of Governors. General Administration requires a site visit, within a calendar year of the date of the letter of approval, by a Team of Examiners with expertise in the field to ascertain the institution’s compliance with the Rules and Standards at the new campus or site.

5. A report of the site visit by the Team of Examiners will be forwarded to General Administration for review and recommendation to the President.

6. The institution must comply with the Rules and Standards to maintain its license to offer the degrees at the additional site.
