

CNS UPDATES 6-30-21

REGULATIONS

- Draft of Regulations has been circulated to CAO's for campus review with a due date of July 30 for comments.
- First draft of the Operations Manual (details of Regulations) is ready for internal review.

ASSESSMENT

- The System Office Assessment Council is developing a proposal to create a comprehensive plan to assess the impact the CNS. More to come.

IT

- CNS Website
 - The Data Tech team is working on a recommended list of features to include in the public facing website. Focus is mostly on Student focused features, though the audience does include faculty, advisors, and other administrators.
 - Features are being fleshed out and ranked for mock-ups/developer review.
- ERP Survey to Registrars and Banner Leads
 - Survey results have been compiled and analysis is currently underway to determine what role campuses will play in managing the link between CNS courses and institutional courses. This will be important to clarify the responsibilities of institutions as well as the System Office.

COURSE REVIEW PROCESS

- The first step of the course review process is complete. Campus academic points of contact have been received and we are currently in the development stage of creating the CNS Course List spreadsheet to distribute to campuses for review in August.
